5- Cash and bank

1.**Project summary and Team members**:

1.1 Team Members:

- Ahmed Awad (Team leader)
- Mohamed Emad Hamdy
- Hussien Ibrahim
- Ghada Abo Elmagd
- Fawzya neseem
- Hager Amin

1.2 Project summary

Core link technologies is a new legal entity that have been created as our Group project in order to apply skills, functions and business cycle that has been gained during Microsoft dynamics functional consultant course, our aim is to apply and implement most of F&O modules, current (FFD) will show step by step with screen shots business process that has been followed by us during the project and it will explain clearly :

- Who does what
- In which order
- What document is created

3. General Ledger Setup:

- Objective: Configure the chart of accounts and financial dimensions:

- Create a chart of accounts.
- Define account structures and rules.
- Set up financial dimensions.
- Configure fiscal calendars and periods.

3.1 Create chart of Accounts

Overview

Chart of accounts is the backbone of ERP system. Its structure all accounting transactions, enable reporting accuracy and ensure proper integration between submodules and the general ledger.

STEP 1: Prepare Excel File with all mandatory yellow Highlighted Columns As shown below figure 3.1:

- Main account ID should have proper numbering structure. For example:
  - 1xxxx → Assets
  - 2xxxx → liabilities
  - 3xxxx → Revenue
  - 4xxxx → Expenses

1	CHARTOFACCOUNTS	MAINACCOUNTID	NAME	MAINACCOUNTTYPE
2	CLT	1000	Assets	Total
3	CLT	1100	Fixed Assets	Total
4	CLT	1110	Buildings	Asset
5	CLT	1120	Equipment	Asset
6	CLT	1130	Vehicles	Asset
7	CLT	1140	Land	Asset
8	CLT	1150	Furniture & Fixtures	Asset
9	CLT	1200	Current Assets	Total
10	CLT	1210	Cash & Bank	Asset
11	CLT	1211	CIB Bank	Asset
12	CLT	1212	National Bank	Asset
13	CLT	1213	Banque Misr	Asset
14	CLT	1214	Cash on Hand	Asset
15	CLT	1220	Accounts Receivable	Asset
16	CLT	1221	Local Clients	Asset

Figure 3.1. adding mandatory fields in excel file

STEP 2: Create Chart of accounts from general ledger

Navigation Path: General ledger > chart of accounts > accounts > chart of accounts > then click new > **add chart of account name same as in Excel file >** description > save

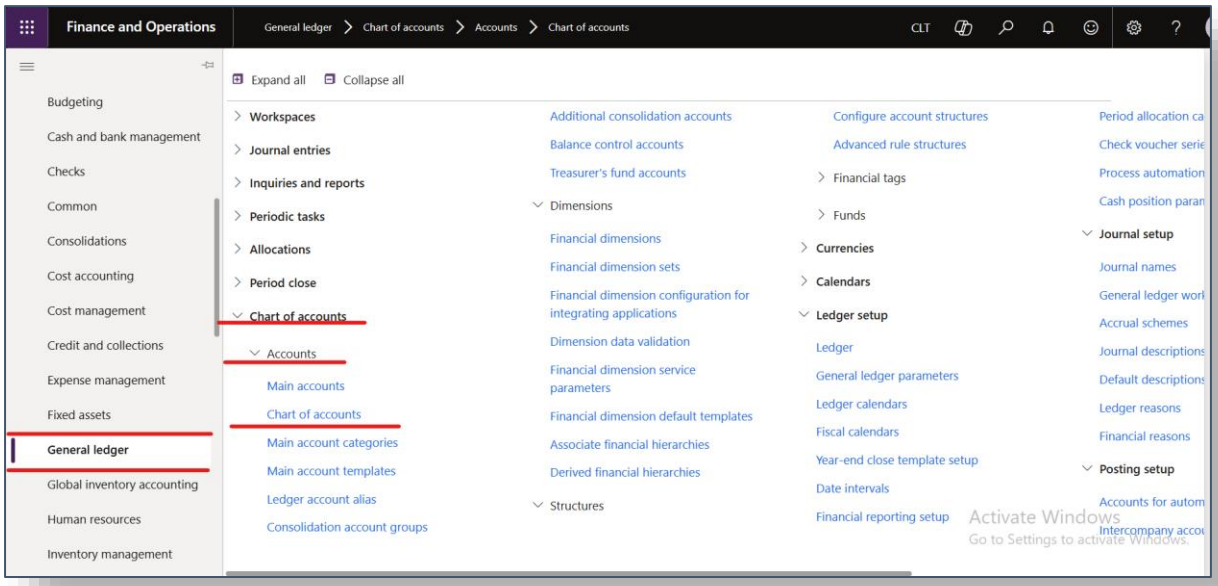

Figure 3.2. adding new chart of account from general ledger

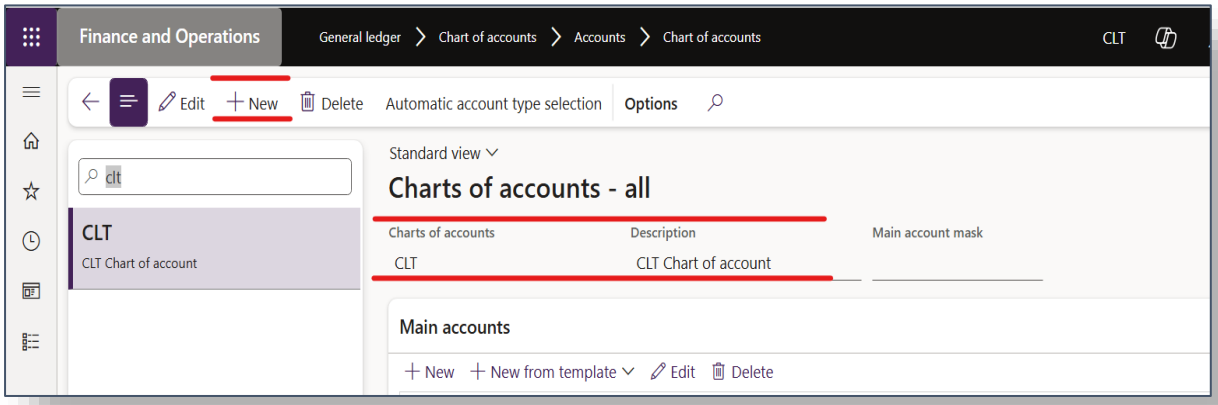

Figure 3.3. add chart of account name and description

STEP 3: Upload chart of accounts Excel File

Navigation Path: system administration > Workspace > data management > click import

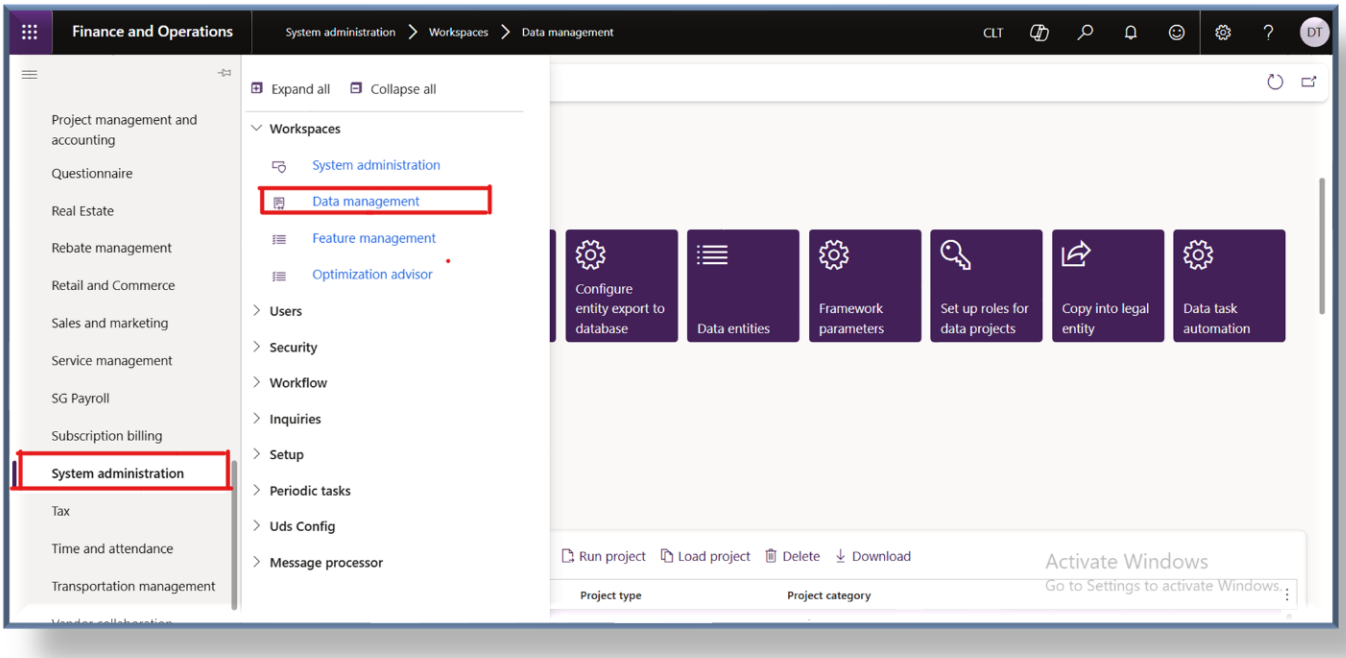

Figure 3.4. system administration and data managment

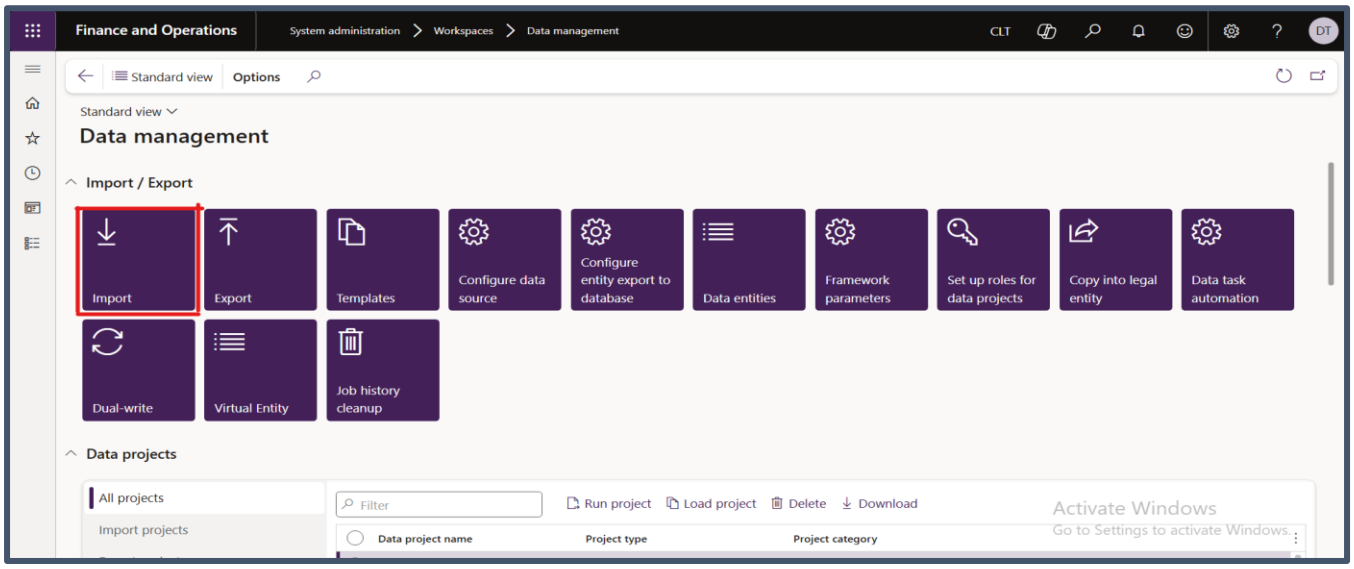

Figure 3.5. import tab to upload excel file

STEP 4: Add new record

Navigation Path: Add Group name (mandatory) ex.CLT > Add file > chose main account from entity name > click upload and add to upload chart of accounts Excel file > after uploading excel go and click import as in figure 3.8

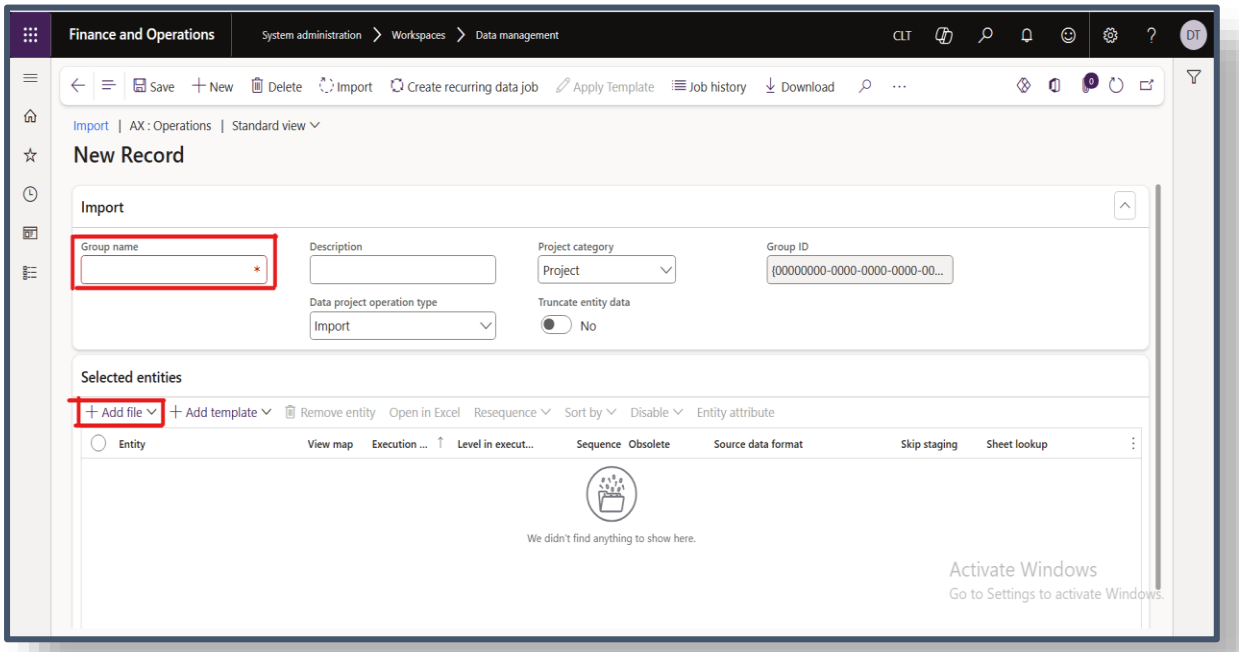

Figure 3.6. Add group name and add file

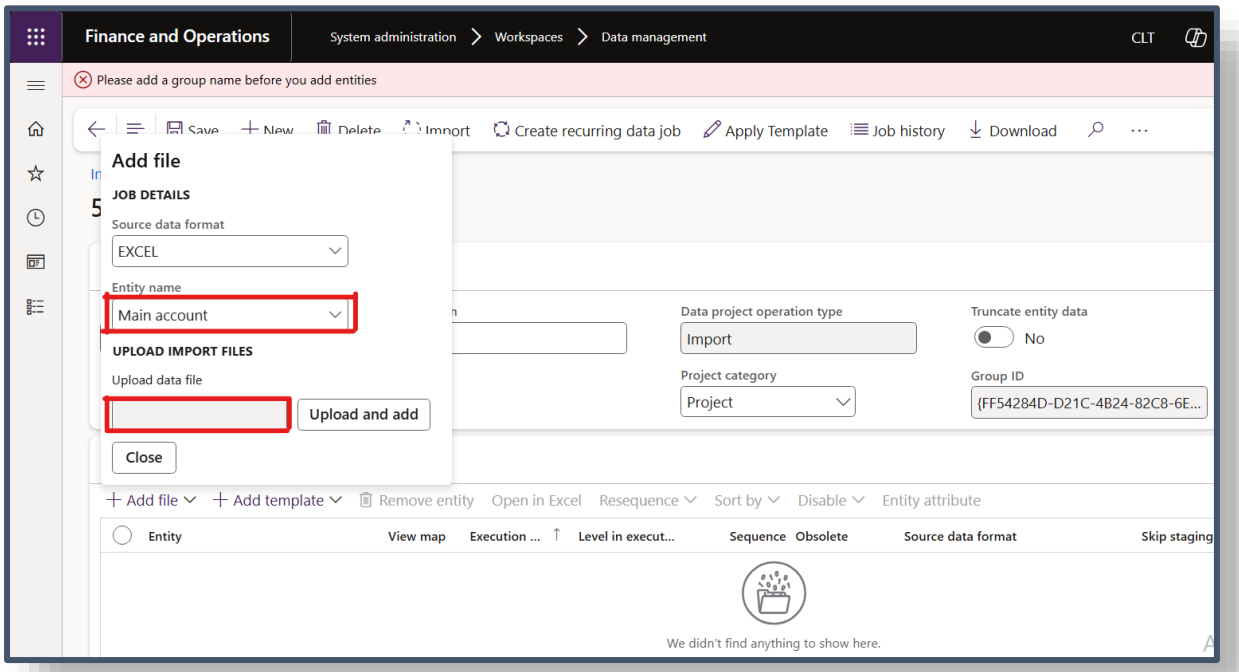

Figure 3.7. upload and add excel file

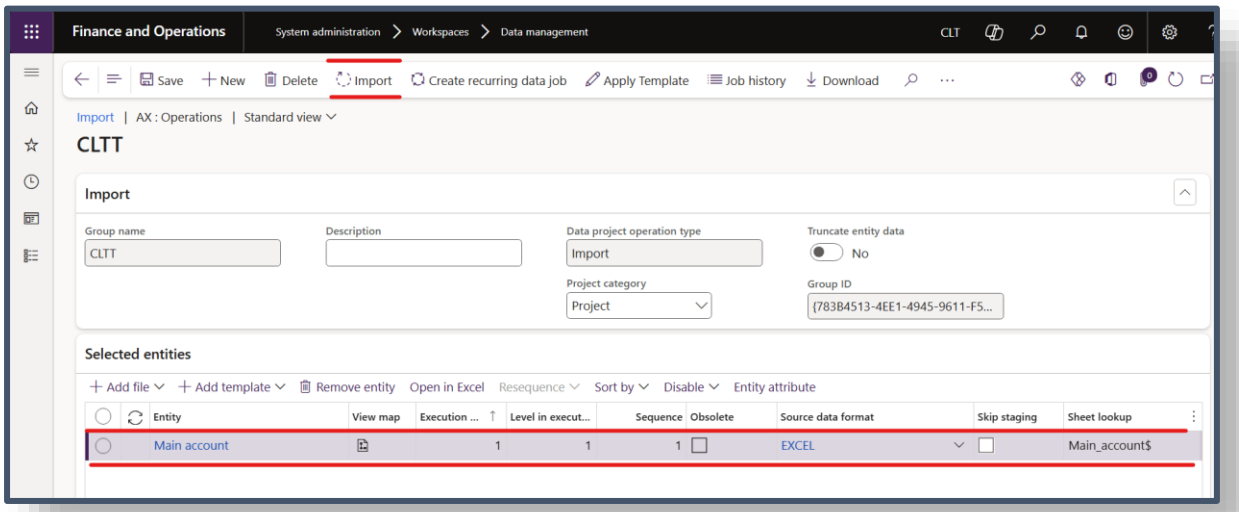

Figure 3.8. click import to start validate chart of account

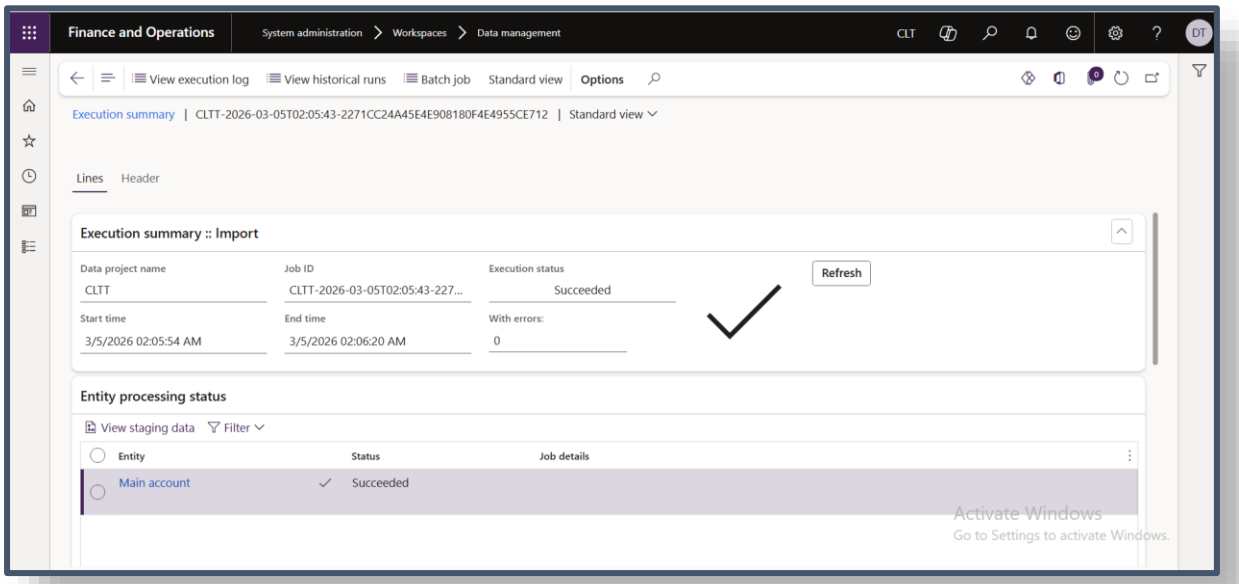

Figure 3.9. Chart of accounts has been successfully imported and validated

➢ 3.2 - Define account structures and rules.

Overview

Account structures use the main account and financial dimensions to create a set of rules that determine the order and values used when entering the account number. You can set up as many account structures as you need for your business. Assign the account structures to a company's ledger setup so you can share them.

STEP 1: Create an account structure:

Go to General ledger > Chart of accounts > Structures > Configure account structures

1- Click New to open the drop dialog.
2- In the Account structure field, type a value.
3- In the Description field, type a value.
4- Click Create

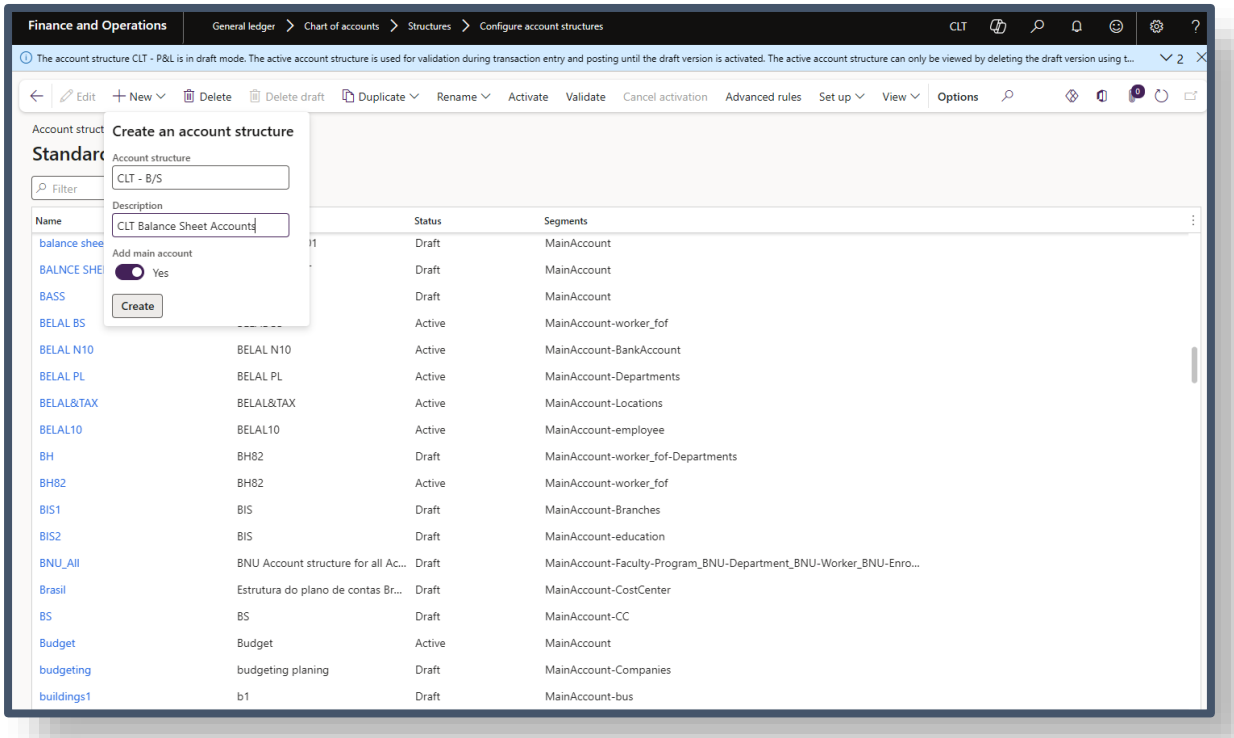

Figure 3.10. Creating B/S Structure

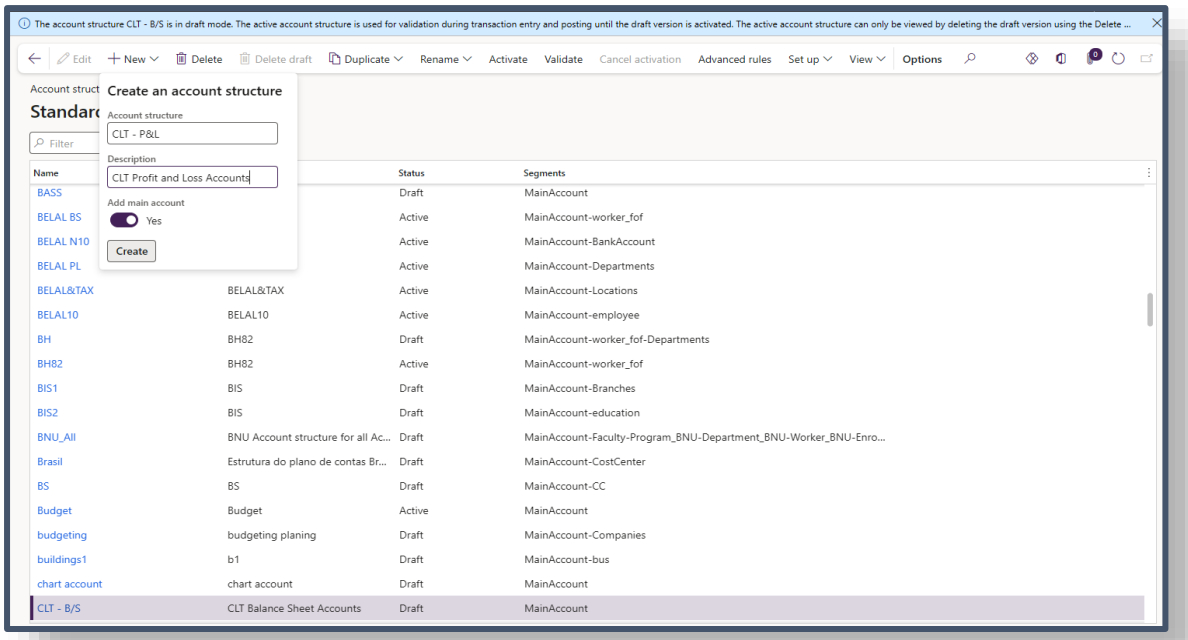

Figure 3.11. Creating P&L Structure

STEP 2: Choose Main Account Values for each Structure

1- In the Operator field, select an option (is between and includes)
2- In the Value field, type a value.
3- In the through field, type a value.
4- Click Apply.

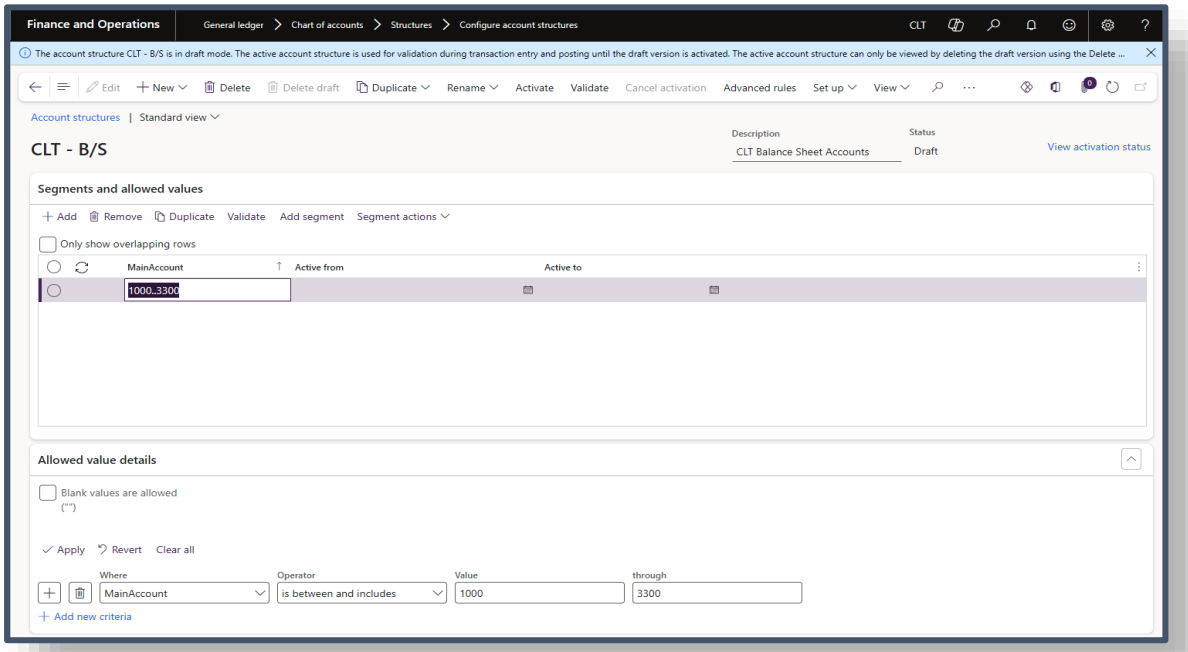

Figure 3.12. Choosing B/S Values

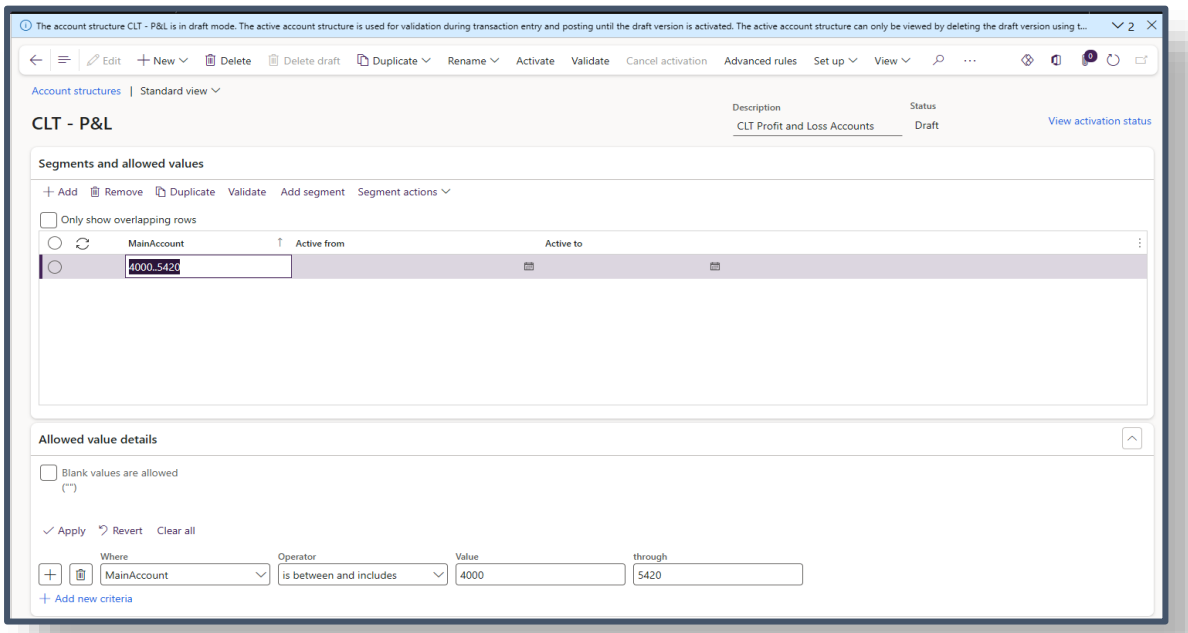

Figure 3.13. Choosing P&L Values

STEP 3: Activate Account Structure:

1- In the account structure list, find and select the desired account structure.
2- Click Activate.
3- Click Activate (Status will change from "Draft" to "Activating" then, "Active").

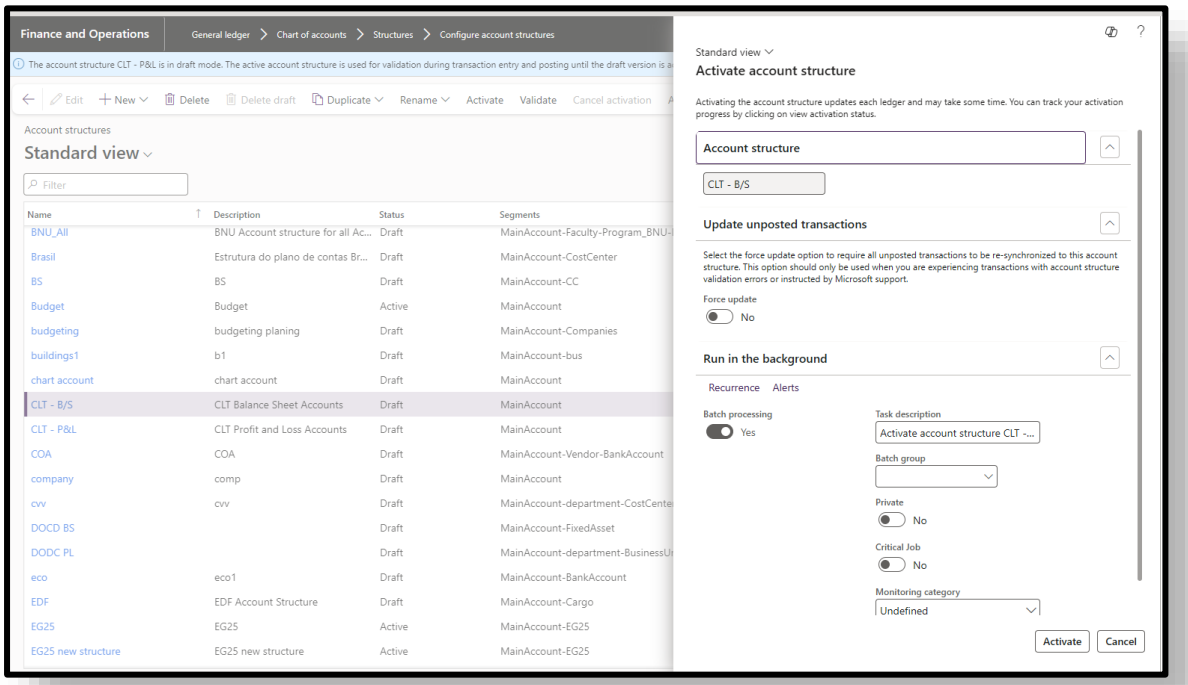

Figure 3.14. Activating account structure

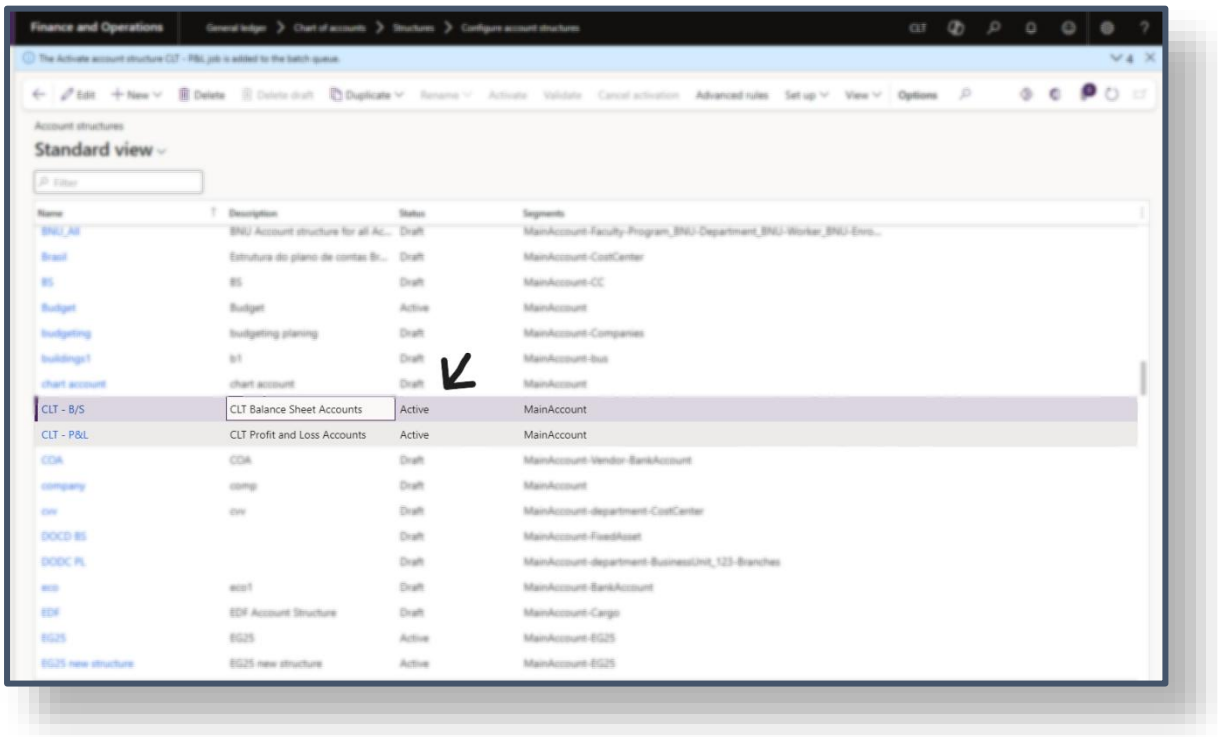

Figure 3.15. Status Changing from Draft to Active

<u>STEP 4: Add account structures on Company's Ledger</u>

1- Go to General ledger > Ledger setup > Ledger
2- Click Add to open the drop dialog.
3- Use the Quick Filter to find records. For example, filter on the Account structure field with a value of 'CLT'.
4- Choose "CLT - B/S" or "CLT - B/S" then, Click Select.
5- Click Yes.

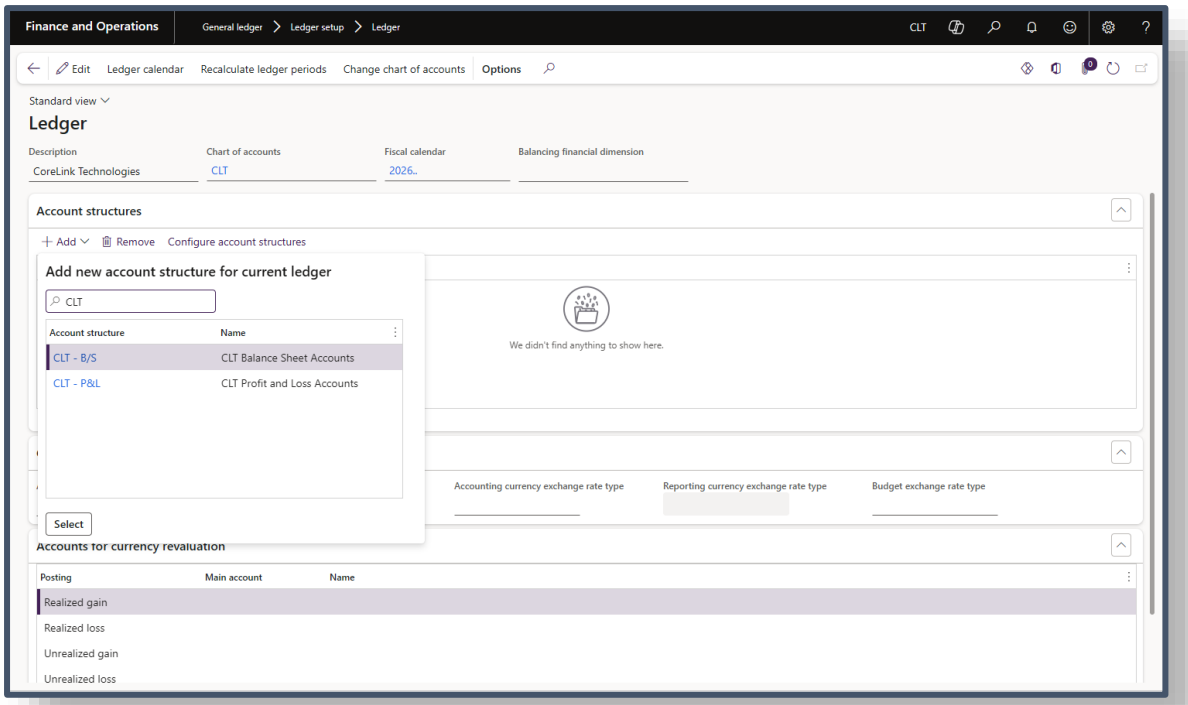

Figure 3.16. Choosing the account structure to be added on ledger

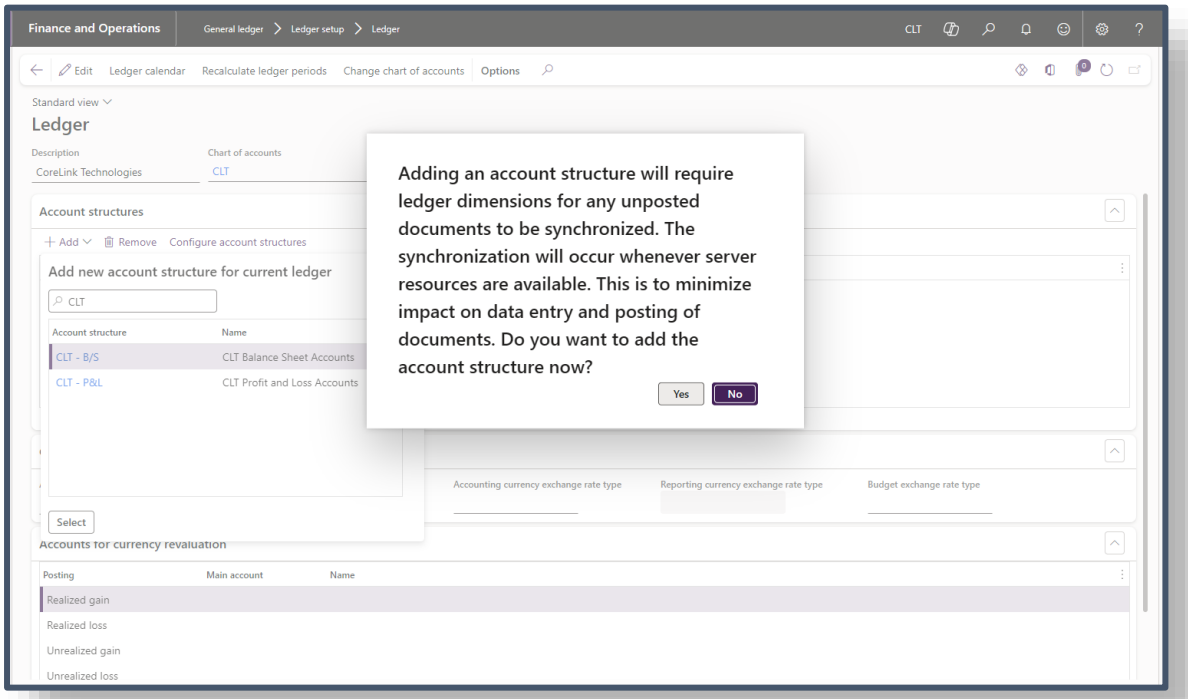

Figure 3.17. Click Yes to add account structure

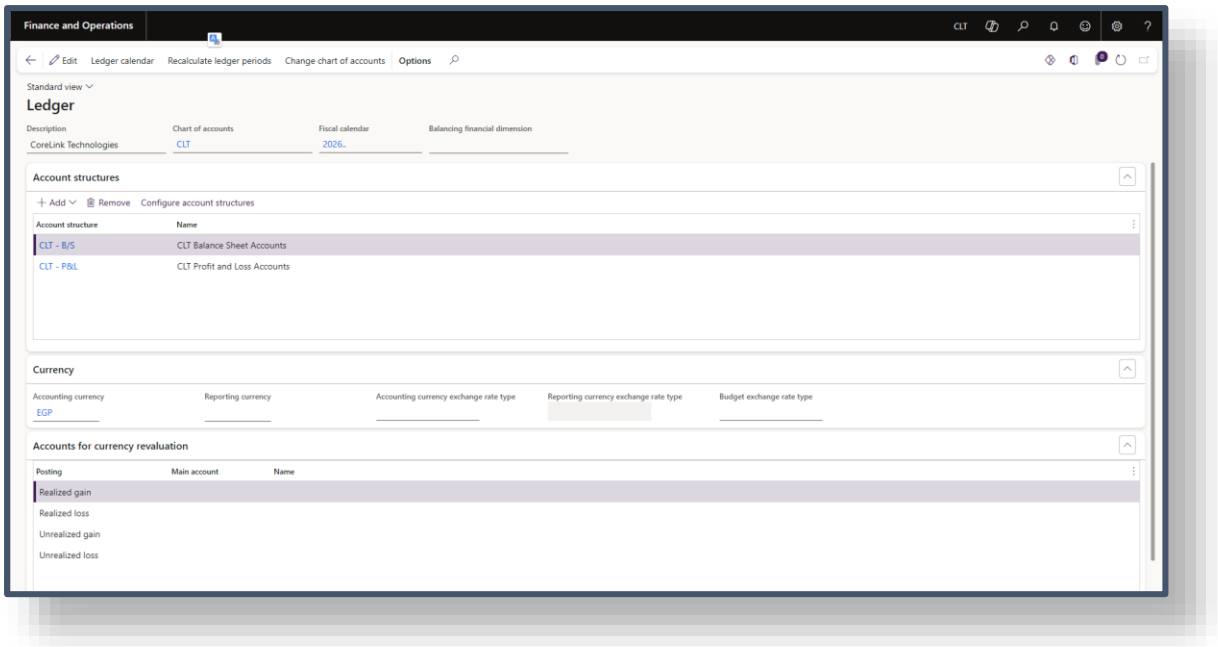

Figure 3.18. Showing the ledger after adding account structures

➢ 3.3 Create CLT Financial Dimension

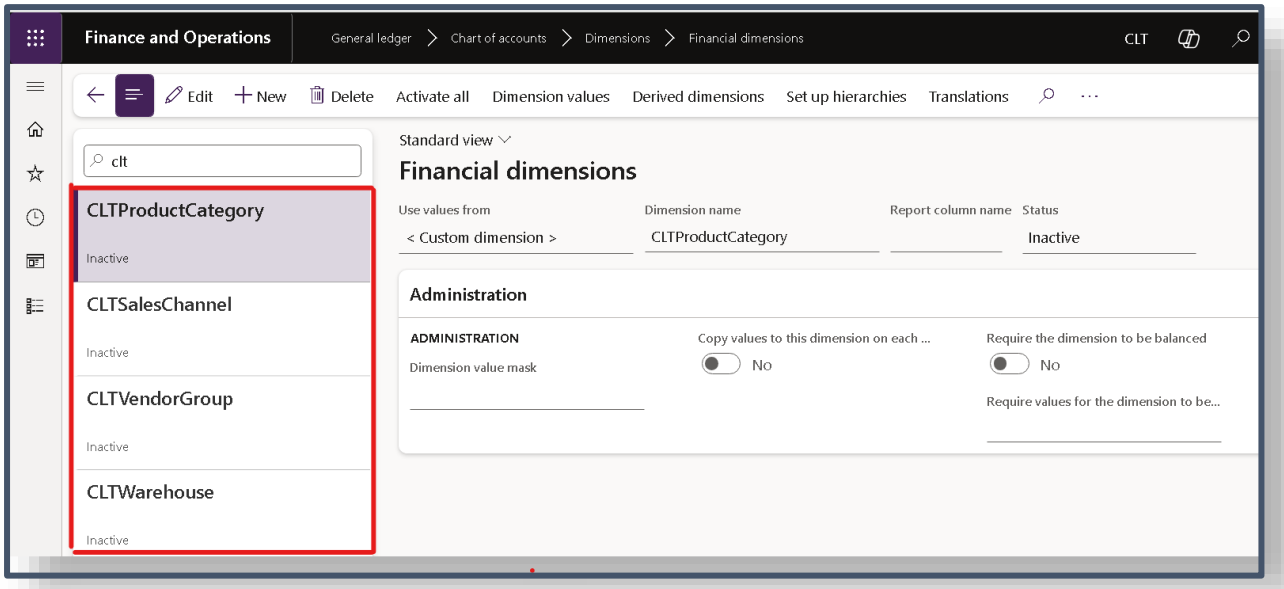
Overview:

In Microsoft Dynamics 365 Finance, financial dimensions are a way to add extra details to financial transactions instead of relying only on the chart of accounts.

Step 1: create CLT Financial Dimension from General Ledger

Navigation Path:

- Go to General Ledger → Chart of accounts → Dimensions →Financial dimensions → Click New
- In the use values from field, select an option.
- In the Dimensions name field, type a value.
- Click save →Click Dimension value →Click New.
- In the Dimension value field, type a value.
- Inn the Description field, type a value.
- Click save.



5.1 create New Financial Dimensions

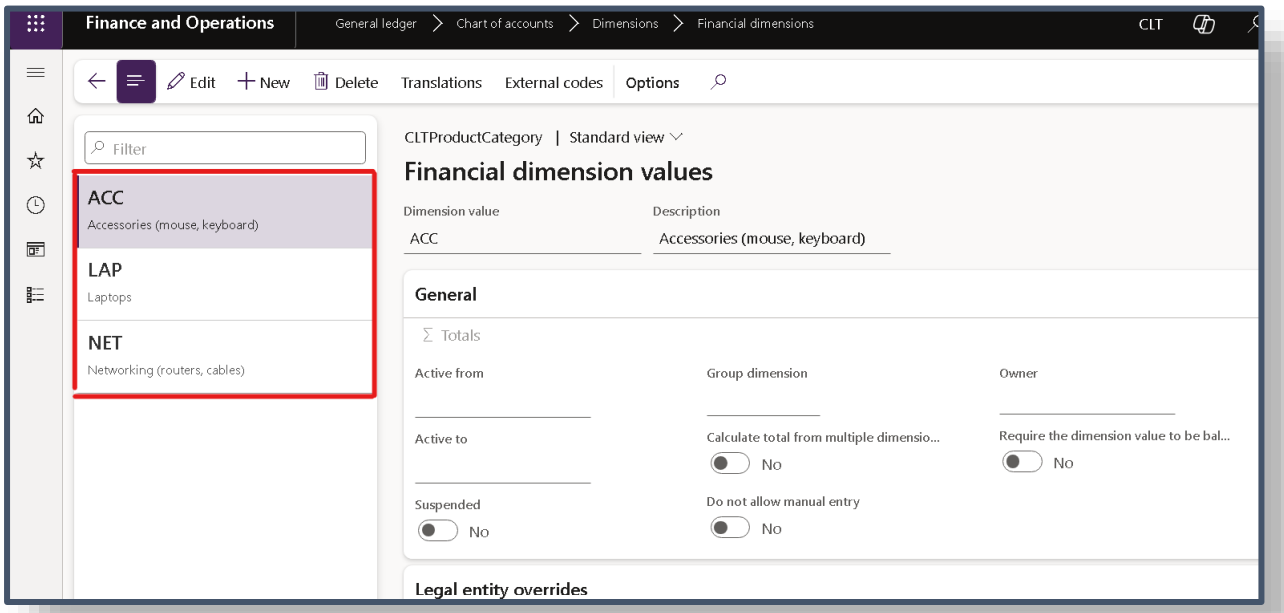


Figure 2.

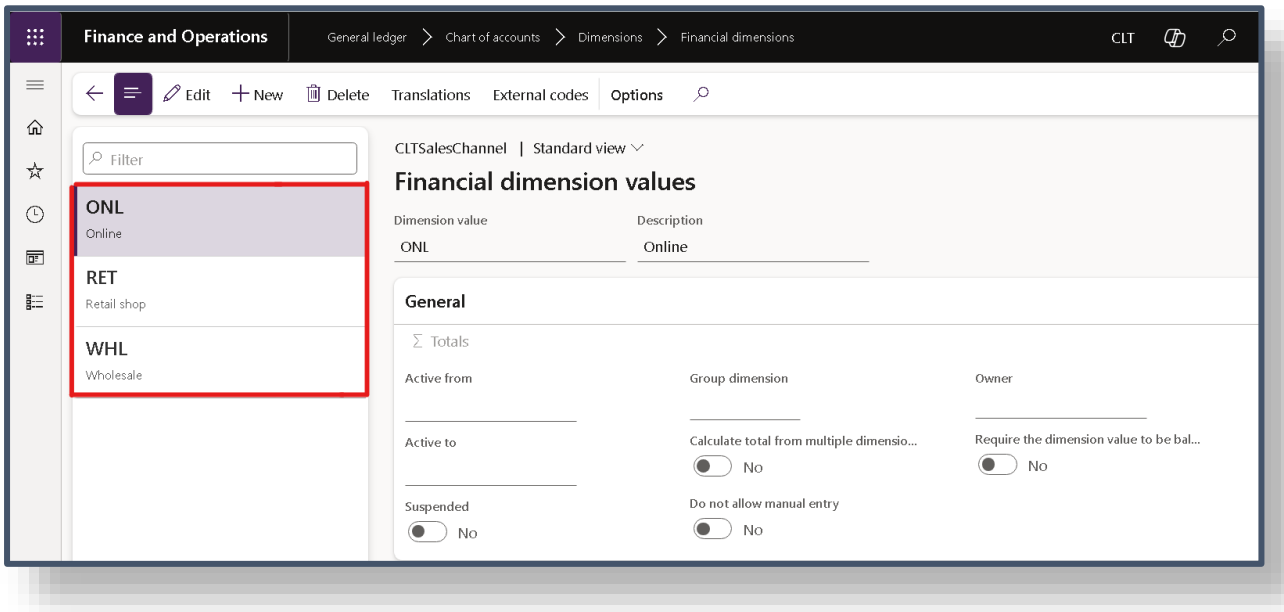

Figure 3.

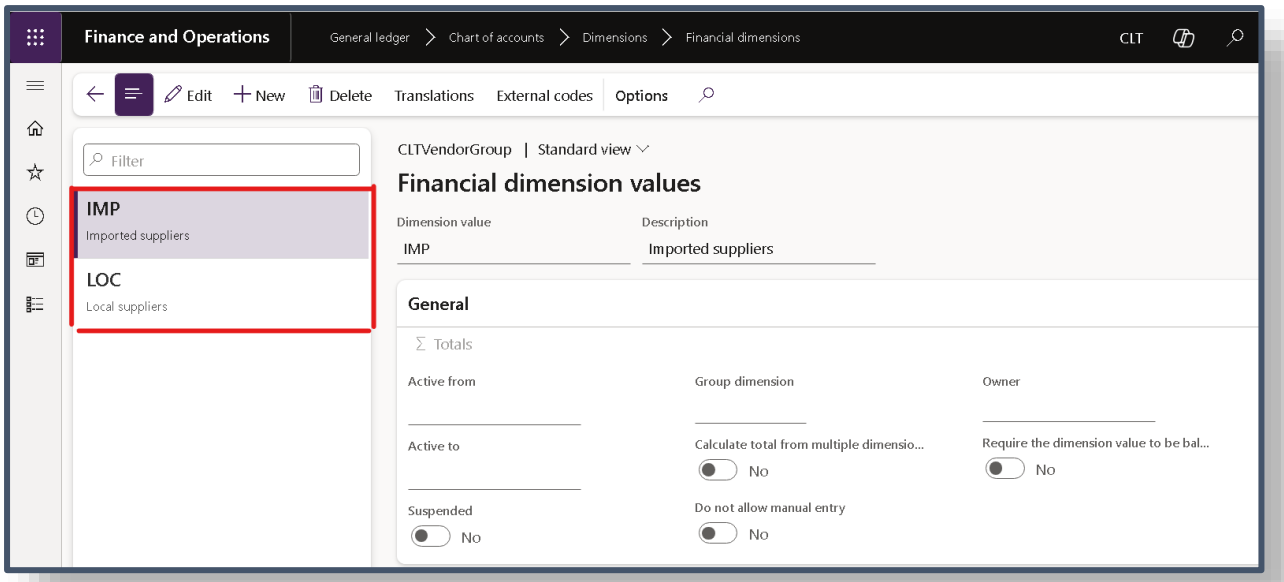

Figure 4.

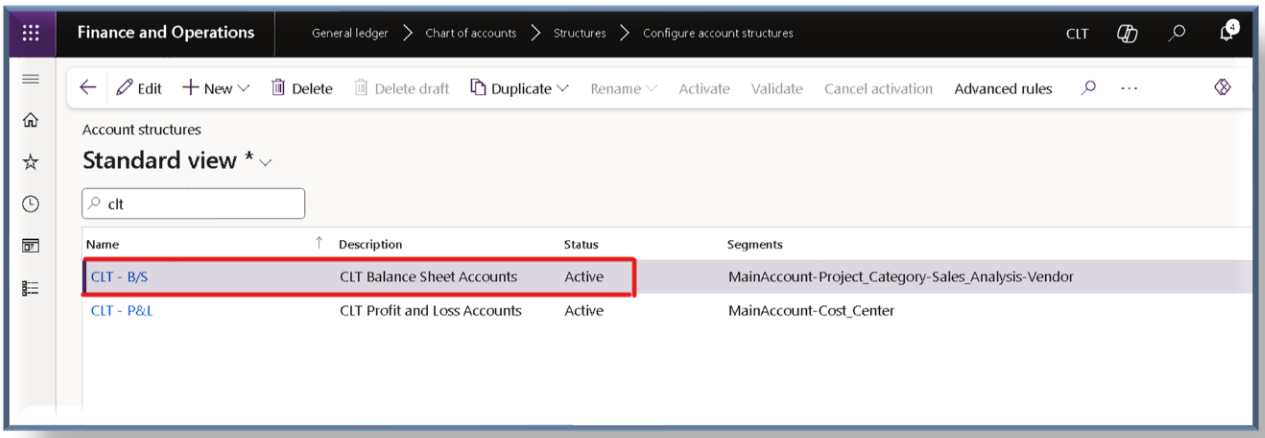
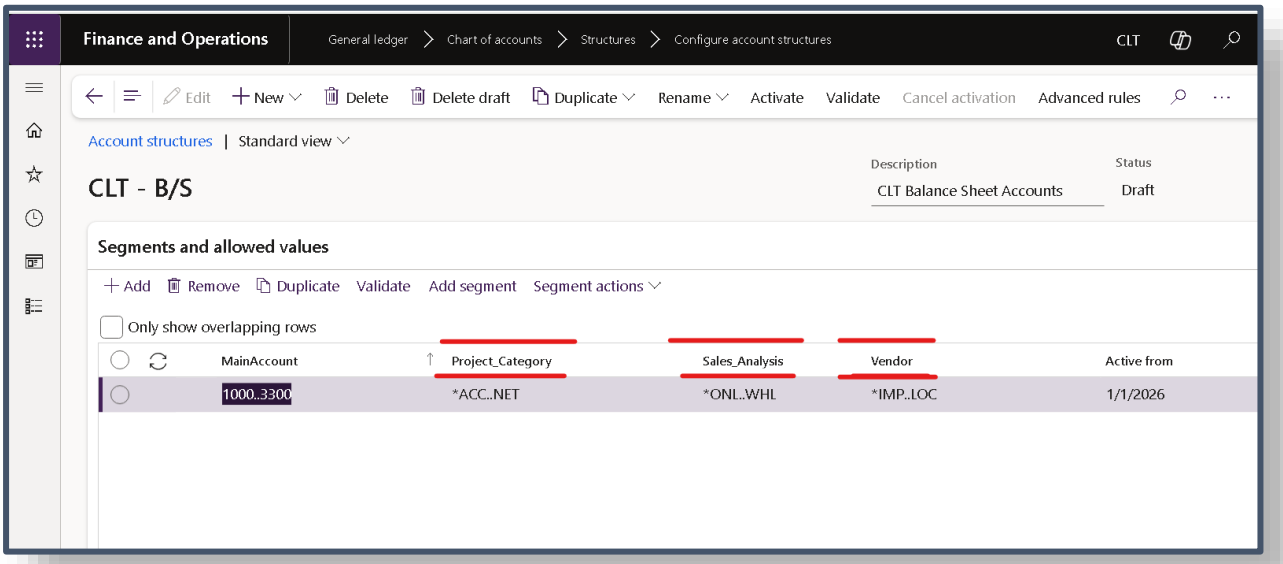
5.2,3,4 create Financial Dimension values

Step 2

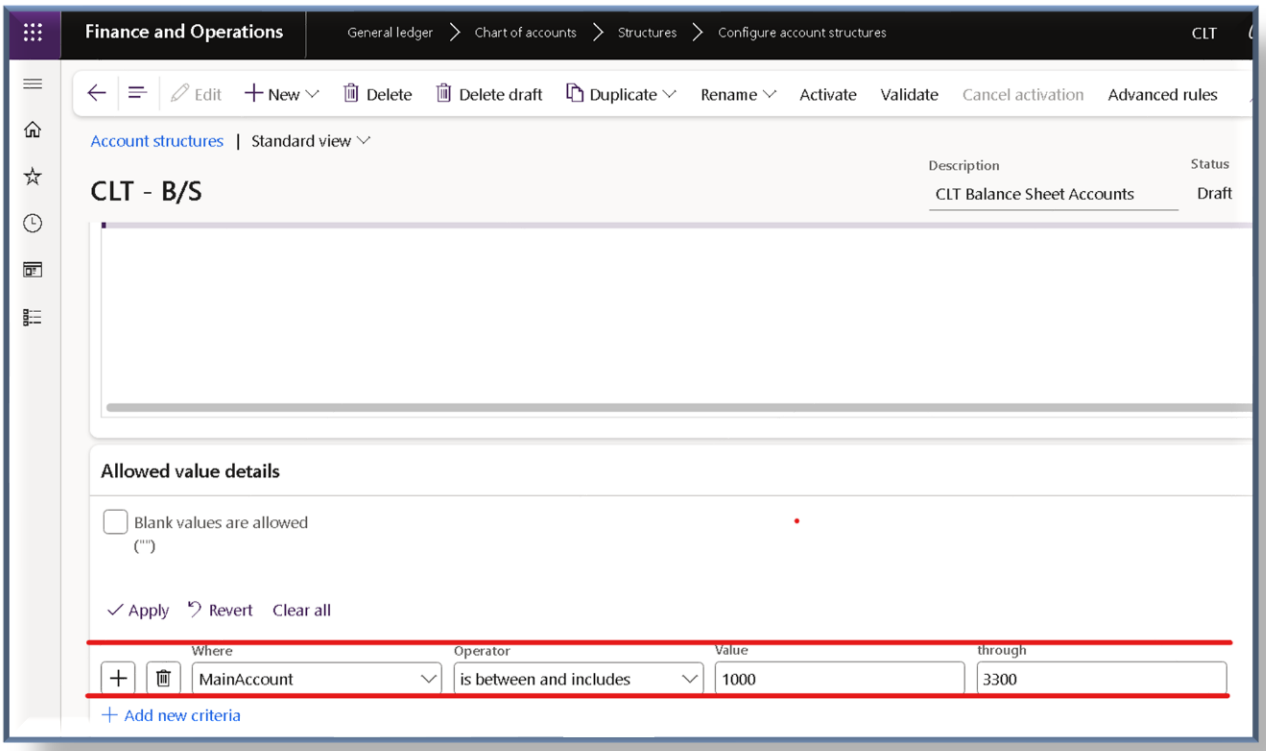
- Go to General Ledger →Ledger setup →Ledger.
- In account structure → Click the CLT - B/S
- Click Add segment
- In the list, select (Product category, Sales analysis, Vendor)
- In the Operator field, select an option
- In the value field, type a value
- In the through field, type a value
- Click Apply



5.3 select CLT – B/S



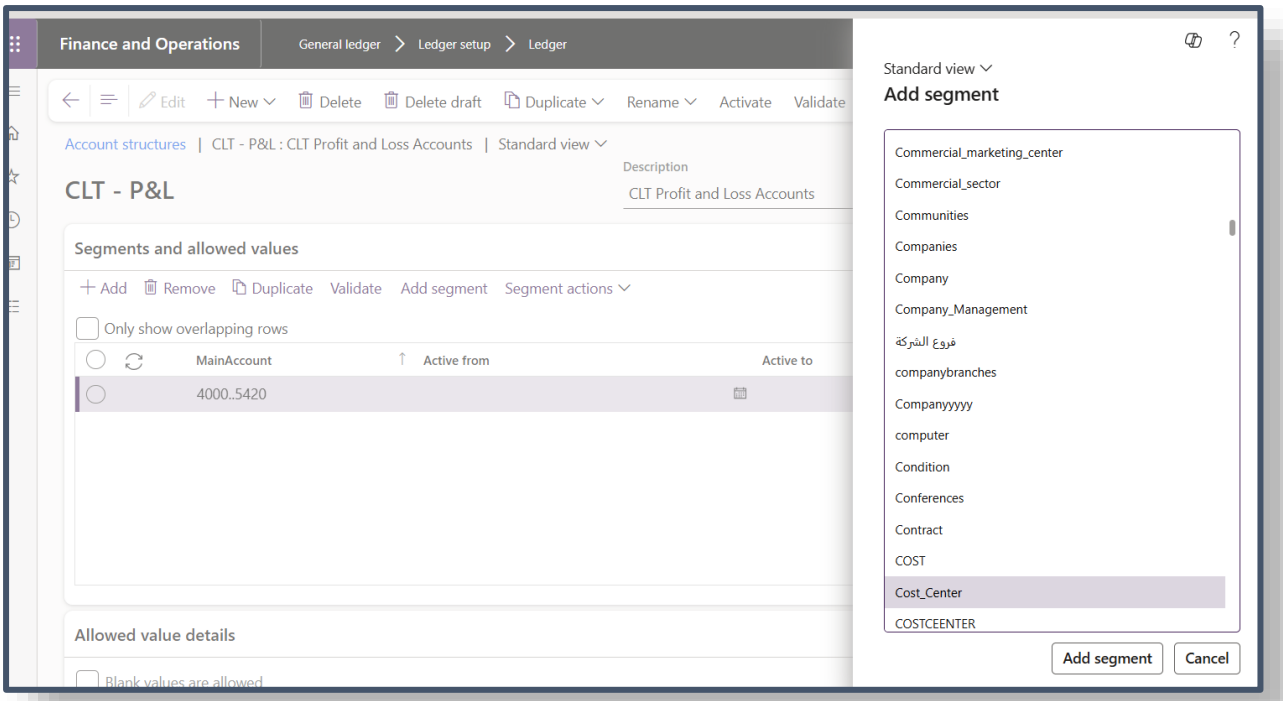
5.4 Add segment and select Department



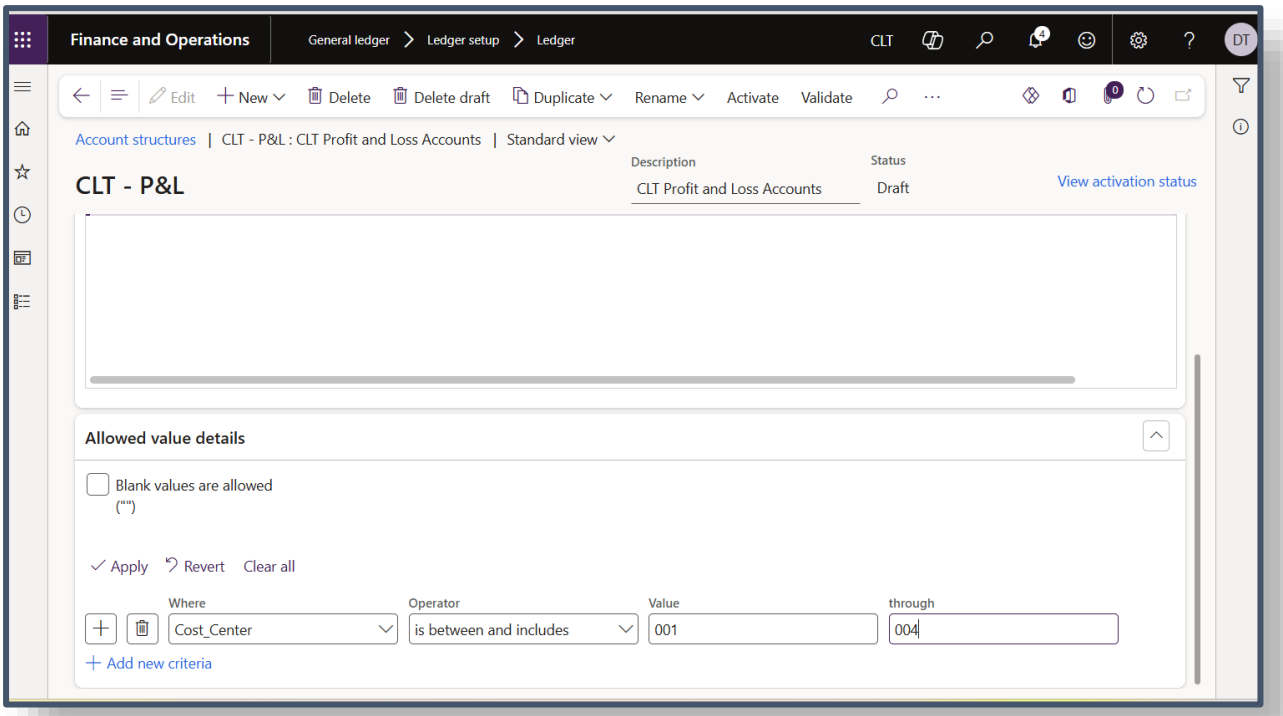
5.5 Add value details and apply

<u>Step 3</u>

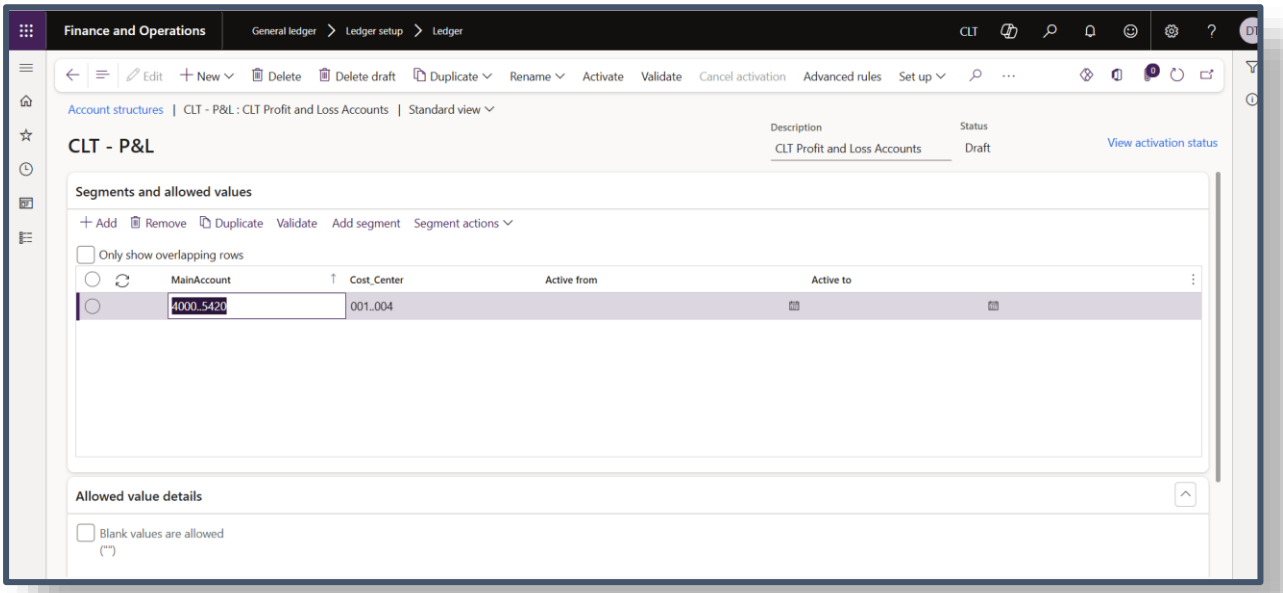
- In account structure → Click the CLT – p&l
- Click Add segment
- In the list, select cost_center
- In the Operator field, select an option
- In the value field, type a value
- In the through field, type a value
- Click Apply



5.6 Add segment and select cost_center



5.7 Add value details and Apply



5.8 determine main account and add segment of profit and loss

➢ 3.4 Create a Fiscal Calender

Overview

A Fiscal Calendar defines the financial year structure used for accounting and reporting. It divides the fiscal year into periods. The fiscal calendar helps companies manage financial reporting and accounting periods. It also allows users to control opening and closing of accounting periods for posting transactions.

Step 1-Create a Fiscal Calender

Go to General Ledger → Calendars → Fiscal Calendar

Click New calendar to open the drop dialog.

1. In the Calendar field, type a value. (CLT- FC)
2. In the Description field, type a value. (CLT- Fiscal Calendar)
3. In the start of fiscal year, Choose the date.
4. In the end of fiscal year, choose the date.
5. In the Fiscal year name field, type a value.

6. In the Length of period field, enter a number.

7. In the Length of period field, enter a number.

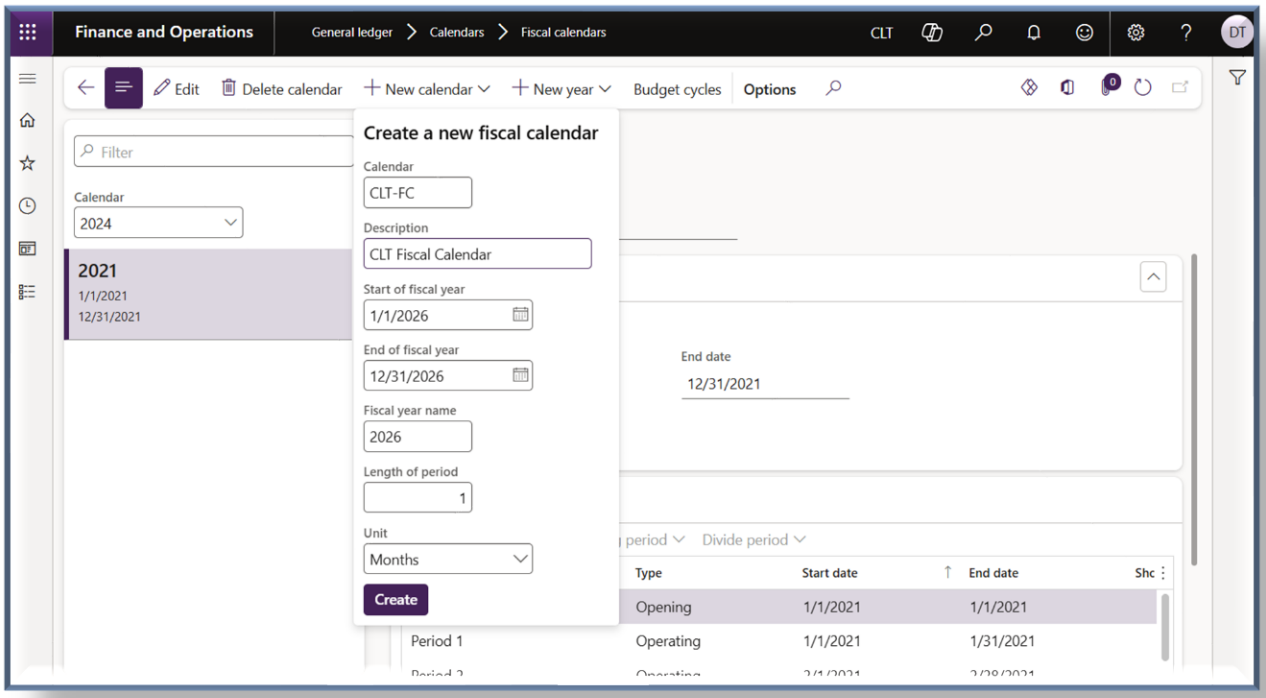


Figure 4.1 Create Fiscal Calendar

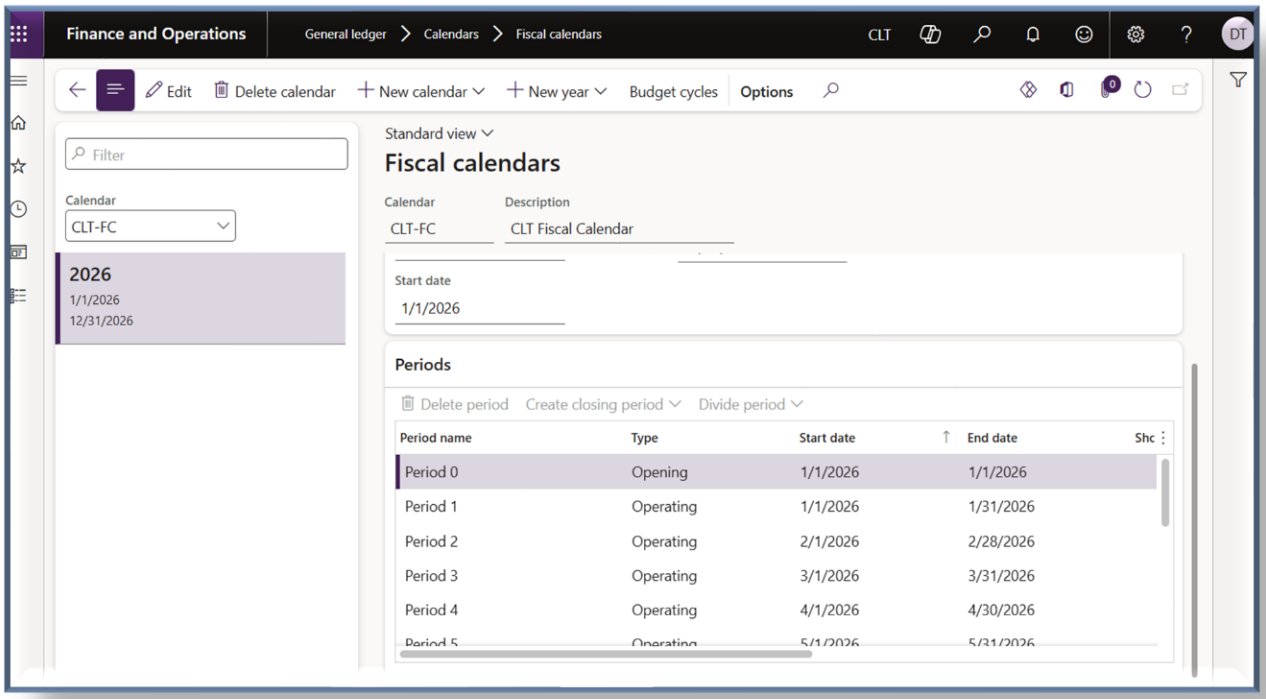

Figure 4.2 Fiscal Calendar for the Company CLT

Step 2- Create a Fiscal Year

1- Click New Year to open the drop dialog.
2- Click Create.

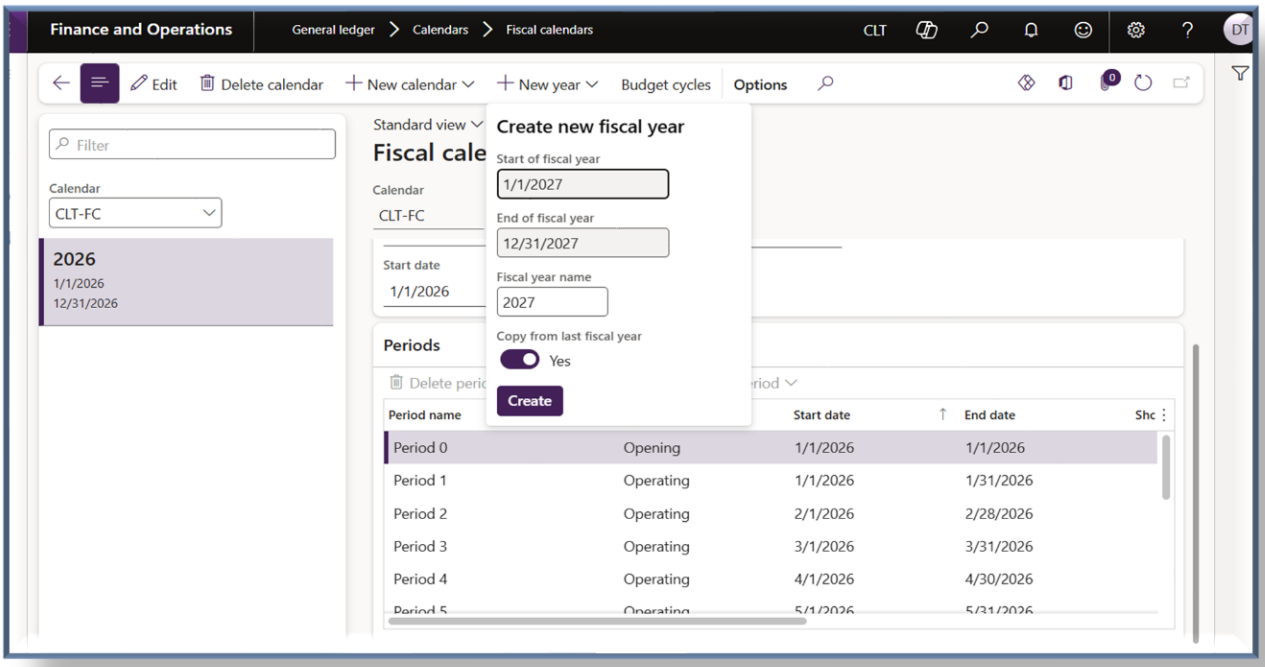

Figure 4.3 Create a Fiscal Year

6

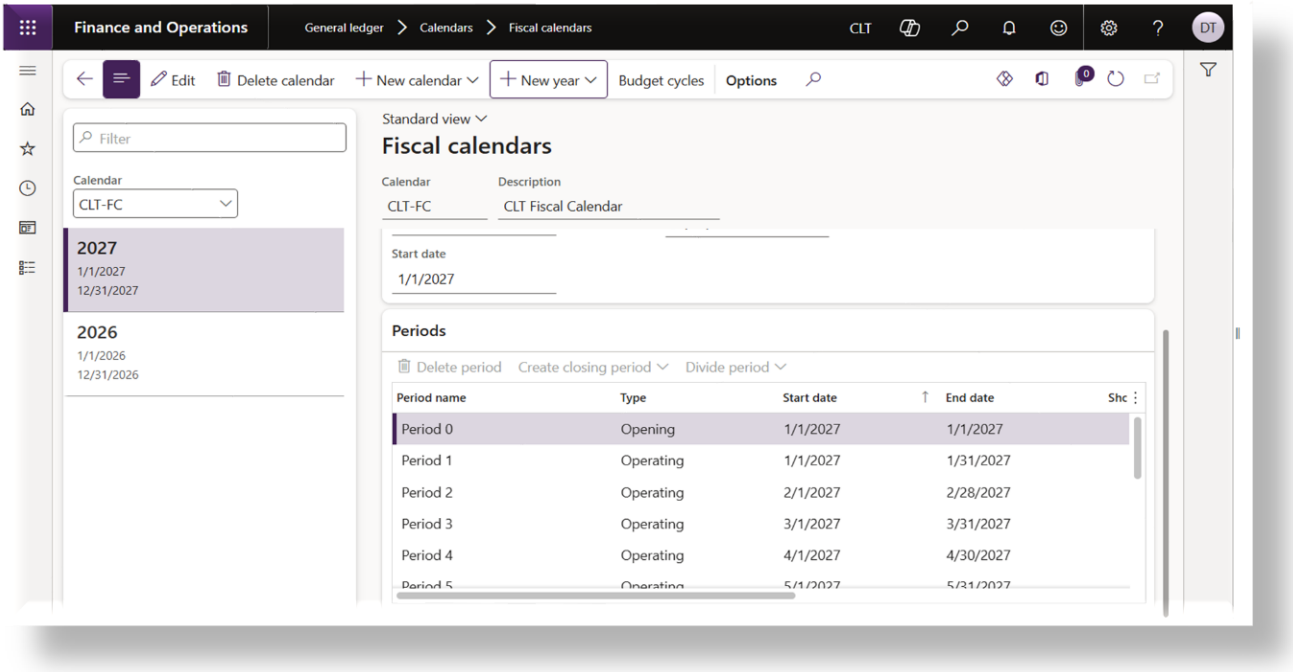

Figure 4.4 Fiscal Year for the Company CLT

Step 3: Assign the Fiscal calendar to the Ledger

1- Go to General Ledger→ Ledger setup →Ledger.
2- In the Fiscal Calendar field select the calendar of the company CLT.
3- Save the changes.

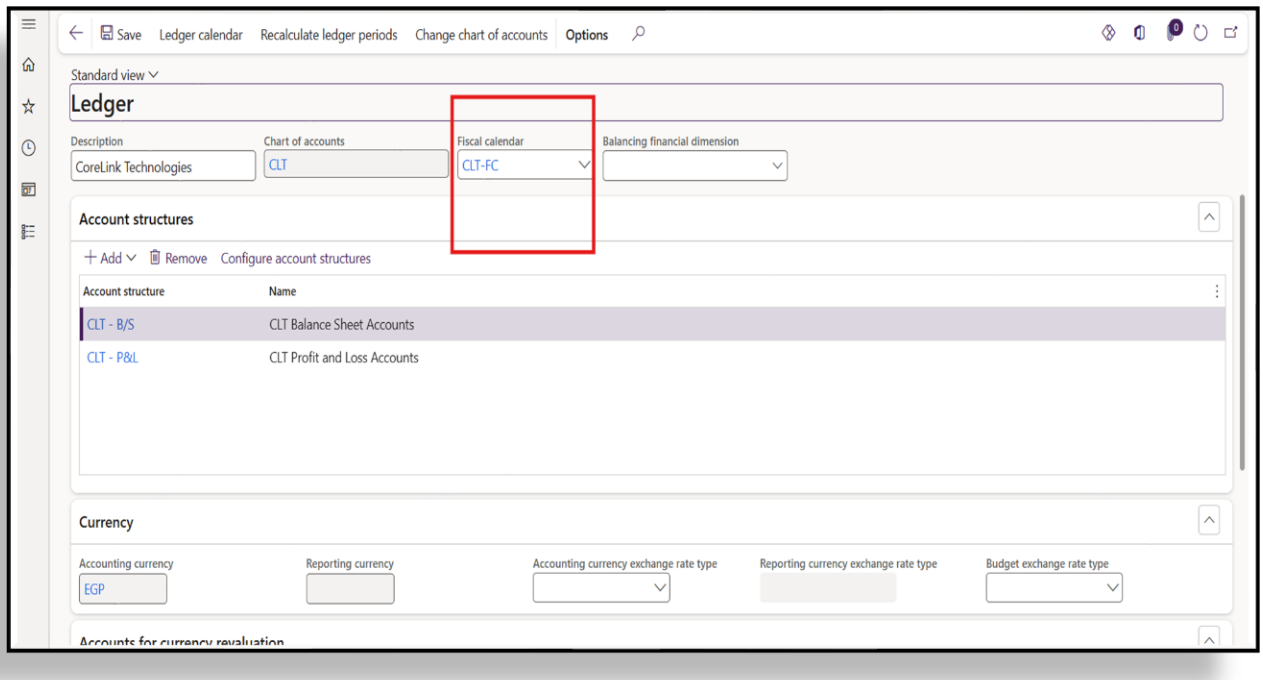

Figure 4.5 The CLT-FC in the Ledgar

➢ 4. Accounts Payable

Overview

Accounts Payable is the module responsible for managing vendor transactions, including vendor creation, invoice processing, payments, and tracking outstanding liabilities through reports like vendor aging.

Scope:

1- Create vendor records.
2- Enter vendor invoices.
3- Process vendor payments.
4- Generate aging reports.

4.1 Create vendor records:

It is the process of setting up a supplier in the system by entering their basic, financial, and payment information, which allows us to record transactions like invoices and payments below figures show how we create vendors' records.

Navigation path: Accounts Payable → Vendors → All Vendors → New

SETP 1: Fulfil required and mandatory data "Vendor account – search name – name – vendor group "Figure 1.1

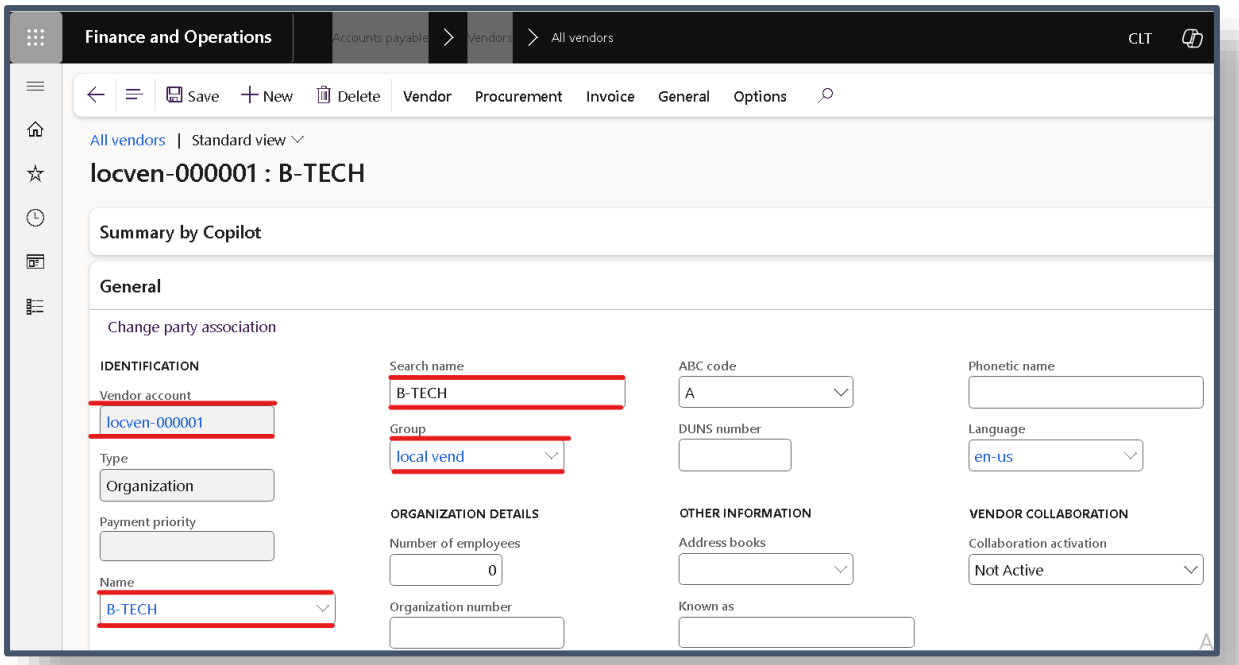

Figure 1.1 Fulfil required and mandatory data

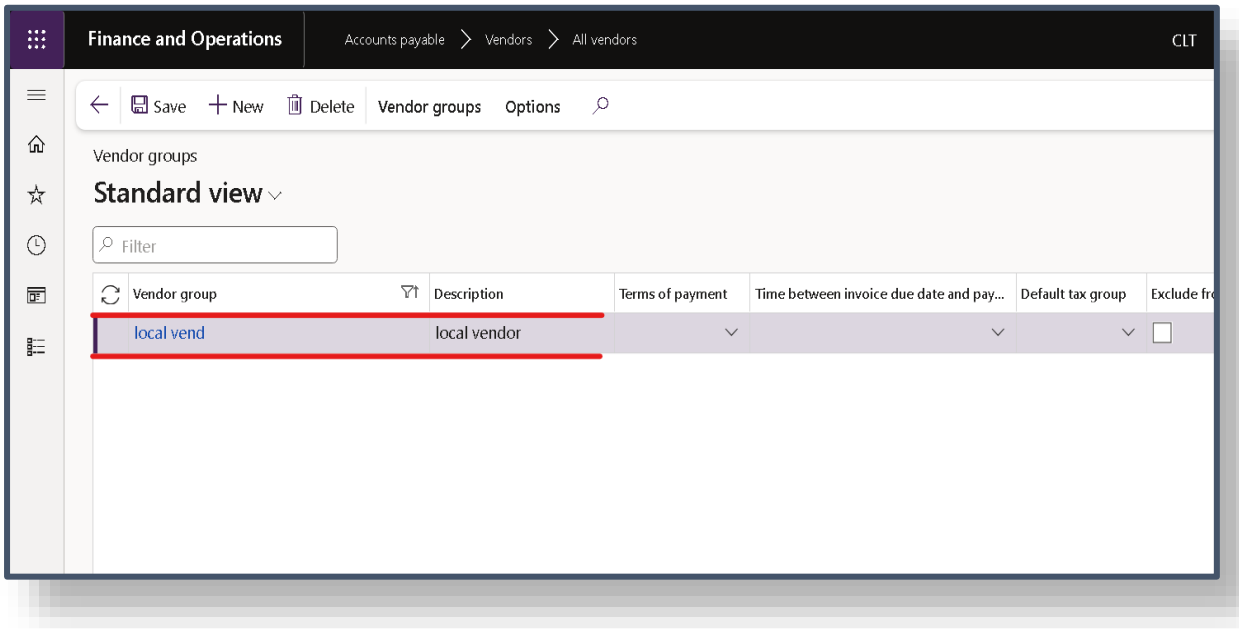

Figure 1.2 Create vendor group to be linked to vendor like in figure 1.1

STEP 2: Create posting profile to link vendor group as below

Navigation path: Accounts Payable → Setup → Vendor posting profile → New

1- Type a name in the posting profile field and description
2- In setup field click add then choose account code "group "
3- Choose summary account "local vendor "

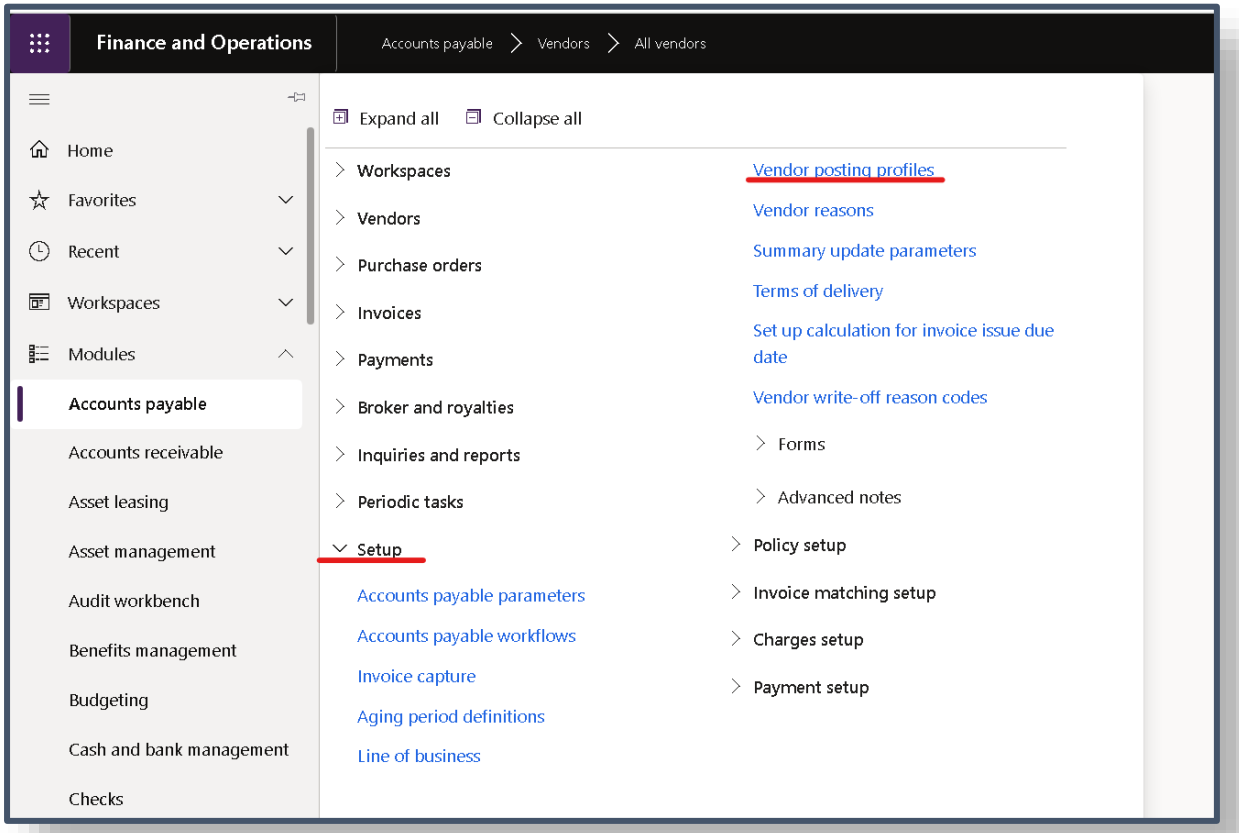

Figure 1.3 vendor posting profile

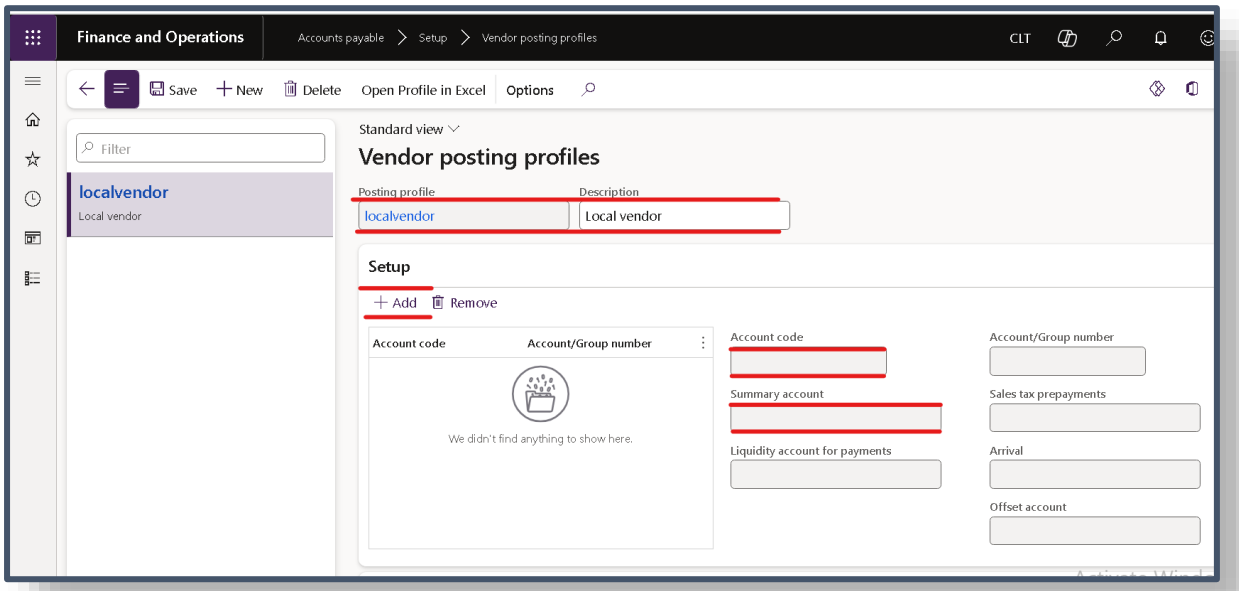

Figure 1.4 vendor posting profile setup done

STEP 3: Create Purchase Order and enter vendor invoice

Navigation path: Accounts Payable → Purchase orders → all purchase order → New

1- In vendor account field choose vender name number "locven-000001"
2- Click on purchase order tab to enter purchase order details
3- In purchase order lines choose ITEM NUMBER "RPRO-00053"
4- Fulfil quantity and price of purchased amount
5- On the head line click on "purchase and click confirm "Your purchase order will be confirmed as below Figure 1.8
6- On the head line click on receive to receive the product from product receipt

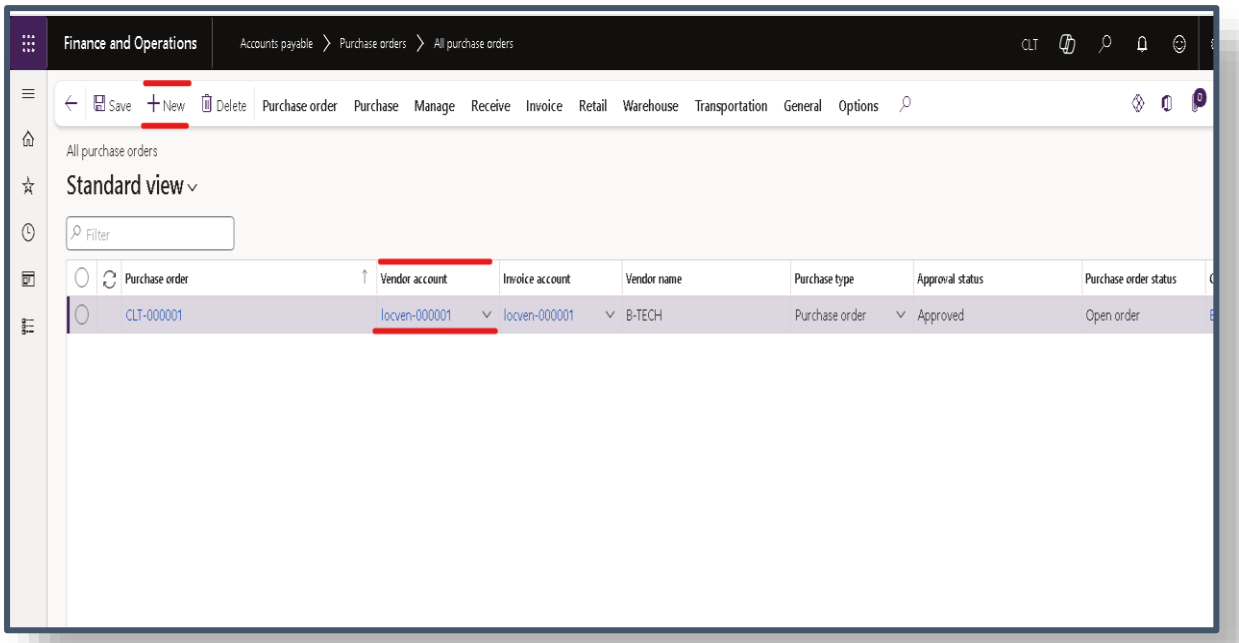

Figure 1.5 create purchase order and choose vendor account

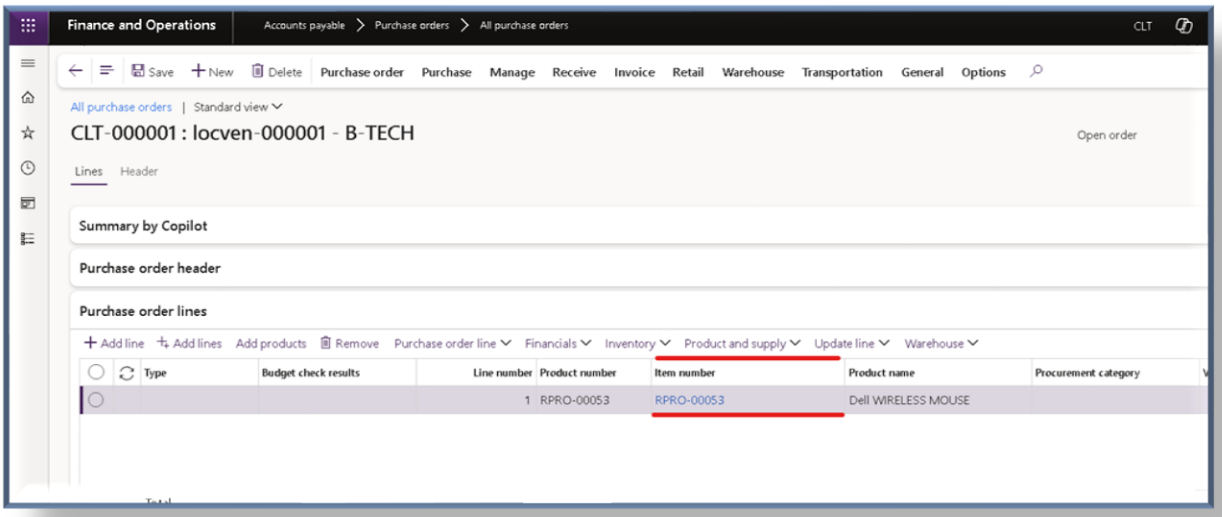

Figure 1.6 choose ITEM NUMBER “RPRO-00053”

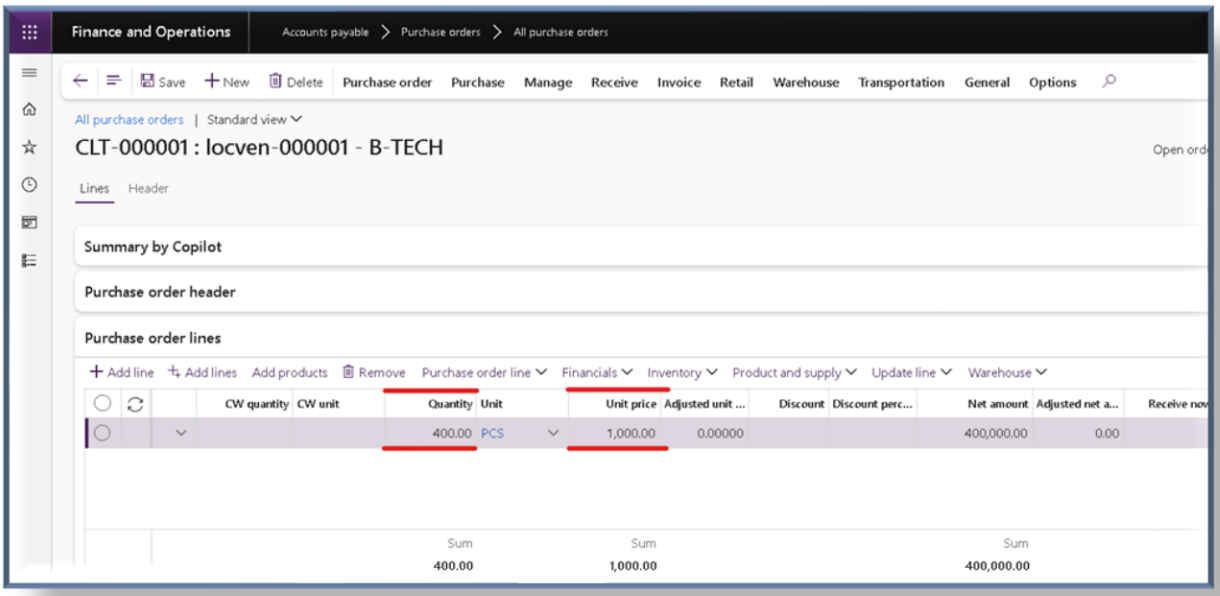

Figure 1.7 fulfil “quantity and unit price “

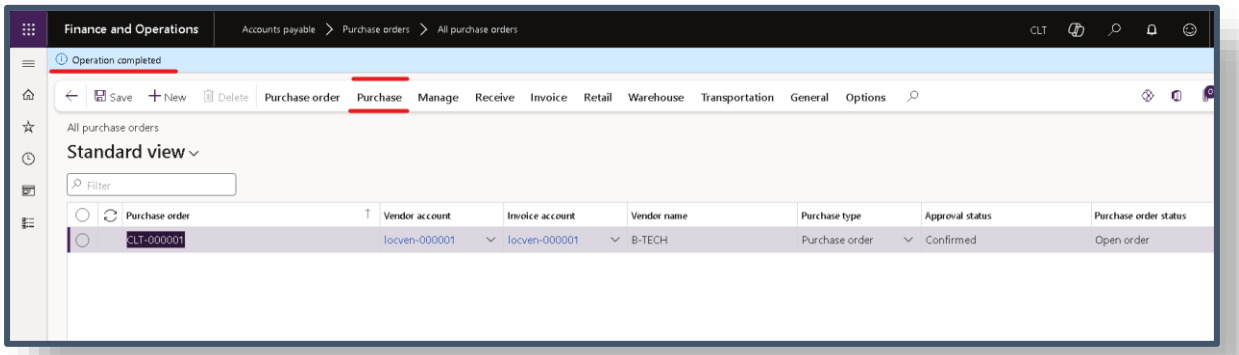

Figure 1.8 purchase order confirmation completed

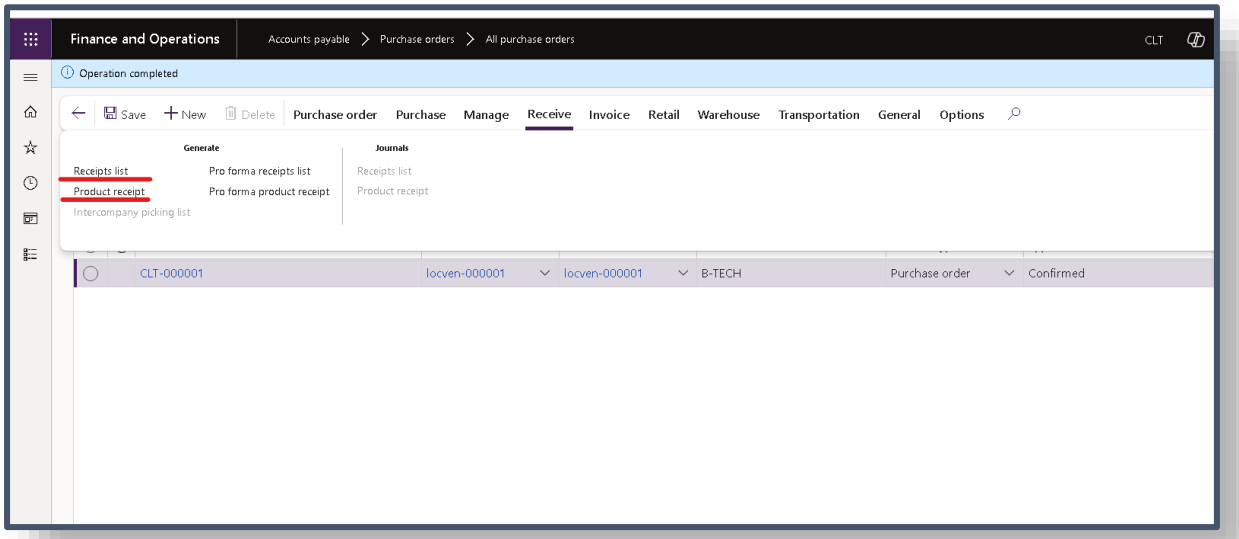

Figure 1.9 receive product from product receipt

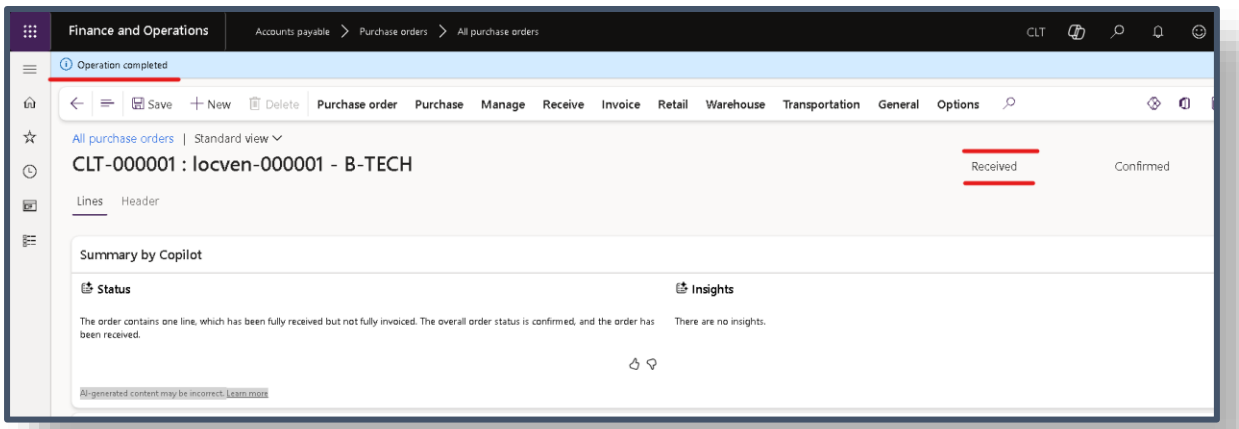

Figure 1.10 product has been received successfully

5.1 – Cash and bank management

Overview

You can use Cash and bank management to maintain the legal entity's bank accounts and the financial instruments that are associated with those bank accounts.

These instruments include deposit slips, checks, bills of exchange, and promissory notes. You can also reconcile bank statements and print bank data on standard reports.

STEP 1: Setup bank accounts

1. Go to Cash and bank management > Bank accounts > Bank accounts.
2. Click New.
3. In the Bank account field, type a value.
4. In the Main account field, specify the desired values.
5. In the Bank account number field, type a value.
6. In the Name field, type a value.
7. In the SWIFT code field, type a value.
8. In the IBAN field, type a value.
9. Click Save.

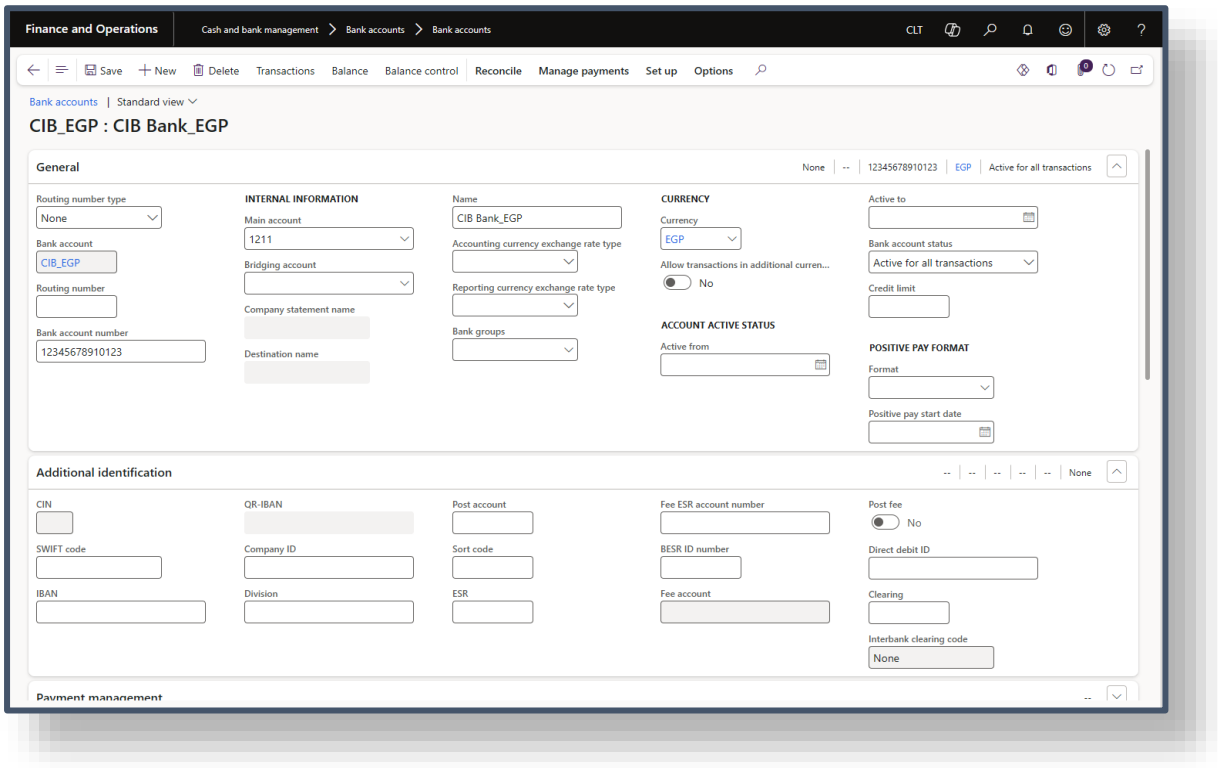

Figure 5.1. Setup bank accounts

STEP 2: Record bank transactions

1. Go to General ledger > Journal entries > General journals.
2. Click New.
3. In the Name field, enter or select a value “Daily”.
4. Click Lines.
5. In the Offset account type field, select an option “Ledger”.
6. In the Account field, specify the desired values ‘Utilities”.
7. In the Debit field, enter a number “1000”.
8. In the Offset account type field, select an option “Bank”.
9. In the Offset account field, specify the desired values “CIB_EGP”.
10. Click Validate.
11. Click Post.
